Dynamic Soil-Structure Interaction C. Zhang,John P Wolf,1998-09-22 Dynamic Soil structure interaction is one of the major topics in earthquake engineering and soil dynamics since it is closely related to the safety evaluation of many important engineering projects such as nuclear power plants to resist earthquakes In dealing with the analysis of dynamic soil structure interactions one of the most difficult tasks is the modeling of unbounded media To solve this problem many numerical methods and techniques have been developed This book summarizes the most recent developments and applications in the field of dynamic soil structure interaction both in China and Switzerland An excellent book for scientists
