Preface Igi Global:

Big Data, Databases and "Ownership" Rights in the Cloud Marcelo Corrales Compagnucci,2019-11-02 Two of the most important developments of this new century are the emergence of cloud computing and big data However the uncertainties surrounding the failure of cloud service providers to clearly assert ownership rights over data and databases during cloud computing transactions and big data services have been perceived as imposing legal risks and transaction costs This lack of clear ownership rights is also seen as slowing down the capacity of the Internet market to thrive Click through agreements drafted on a take it or leave it basis govern the current state of the art and they do not allow much room for negotiation The novel contribution of this book proffers a new contractual model advocating the extension of the negotiation capabilities of cloud customers thus enabling an automated and machine readable framework orchestrated by a cloud broker Cloud computing and big data are constantly evolving and transforming into new paradigms where cloud brokers are predicted to play a vital role as innovation intermediaries adding extra value to the entire life cycle This evolution will alleviate the legal uncertainties in society by means of embedding legal requirements in the user interface and related computer systems or its code This book situates the theories of law and economics and behavioral law and economics in the context of cloud computing and takes database rights and ownership rights of data as prime examples to represent the problem of collecting outsourcing and sharing data and databases on a global scale It does this by highlighting the legal constraints concerning ownership rights of data and databases and proposes finding a solution outside the boundaries and limitations of the law By allowing cloud brokers to establish themselves in the market as entities coordinating and actively engaging in the negotiation of service level agreements SLAs individual customers as well as small and medium sized enterprises could efficiently and effortlessly choose a cloud provider that best suits their needs This approach which the author calls plan like architectures endeavors to create a more trustworthy cloud computing environment and to yield radical new results for the development of the cloud computing and big data markets   Transforming Financial Management with AI, BI, and Data-Driven Decision Making Sanjay Taneja,Bhupinder Pal Singh Chahal,Ercan Ozen,2026-02-23 Transforming Financial Management with AI BI and Data Driven Decision Making offers a comprehensive exploration of how emerging technologies are revolutionising the financial landscape This timely work delves into the powerful convergence of artificial intelligence business intelligence and data analytics providing financial professionals with a roadmap to harness these tools for operational efficiency risk mitigation and strategic growth Through a blend of theoretical insights and practical implementation strategies readers will gain a deep understanding of how to navigate and lead in a rapidly evolving financial environment As organisations grapple with the exponential growth of data and the increasing complexity of digital tools the ability to make informed data driven decisions has become a critical differentiator This essential guide for business leaders analysts and decision makers offers real world case studies actionable frameworks and applied methodologies it empowers readers to translate technological
