Pricing And Hedging Asian Style Options On Energy:

Pricing and Hedging Asian-Style Options in Energy Fred Espen Benth, 2014 We solve the problem of pricing and hedging Asian style options on energy with a quadratic risk criterion when trading in the underlying future is restricted Liquid trading in the future is only possible up to the start of a so called delivery period After the start of the delivery period the hedge positions can not be adjusted anymore until maturity This reflects the trading situation at the Nordic energy market Nord Pool for example We show that there exists a unique solution to this combined continuous discrete quadratic hedging problem if the future price process is a special semimartingale with bounded mean variance tradeoff Additionally under the assumption that the future price process is a local martingale the hedge positions before the averaging period are inherited from the market specification without trading restriction As an application we consider three models and derive their quadratic hedge positions in explicit form a simple Black Scholes model with time dependent volatility the stochastic volatility model of Barndorff Nielsen and Shephard and an exponential additive model Based on an exponential spot price model driven by two NIG levy processes we determine an exponential additive model for the future price by moment matching techniques We calculate hedge positions and determine the quadratic hedge error in a simulation study *Energy Hedging in Asia: Market Structure and Trading Opportunities* P. Fusaro, T. James, 2005-08-02 This book focuses on the latest developments in the Asia Pacific community in terms of how deregulation and privatization are bringing more risk to energy companies In the light of these market changes interest in energy risk management has grown substantially and is becoming a fiduciary responsibility of energy companies As energy trading power exchanges and hedging techniques establish themselves in the oil power and gas sectors so then do newer derivatives markets emerge in LNG hedging weather derivatives and freight hedging Fusaro and James as seasoned market practitioners in the region focus on these market changes and examine the future of Asian energy hedging **Energy Markets** Tom James, 2012-11-27 Price Risk Management and Trading Energy risk management expert Tom James does it again His latest book is a timely addition to the rapidly developing energy trading markets This book should be on every energy trader risk manager and corporate planner s desk it is an easy read as Tom goes into great detail to explain the intricacies of this market and its various unique elements Peter C Fusaro Chairman Global Change Associates Inc Best selling Author and Energy Expert This sensible and practical guide is essential for those seeking an understanding of commerce in energy derivatives beyond merely informative this hand book for the practitioner details the finer points of the use of derivatives as tools for price risk management No energy trading desk should be without it Ethan L Cohen Senior Director Utility and Energy Technology UtiliPoint International Inc Energy markets are much more volatile than other commodity markets so risk mitigation is more of a concern Energy prices for example can be affected by weather geopo9litical turmoil changes in tax and legal systems OPEC decisions analysis reports transportation issues and supply and demand to name just a few factors Tom James s book is a practical guide to
