Statistical Factor Analysis and Related Methods Alexander T. Basilevsky, 2009-09-25 Statistical Factor Analysis and Related Methods Theory and Applications In bridging the gap between the mathematical and statistical theory of factor analysis this new work represents the first unified treatment of the theory and practice of factor analysis and latent variable models It focuses on such areas as The classical principal components model and sample population inference Several extensions and modifications of principal components including Q and three mode analysis and principal components in the complex domain Maximum likelihood and weighted factor models factor identification factor rotation and the estimation of factor scores The use of factor models in conjunction with various types of data including time series spatial data rank orders and nominal variable Applications of factor models to the estimation of functional forms and to least squares of regression estimators

Principal Components Analysis George H. Dunteman, 1989-05 For anyone in need of a concise introductory guide to principal components analysis this book is a must Through an effective use of simple mathematical geometrical and multiple real life examples such as crime statistics indicators of drug abuse and educational expenditures and by minimizing the use of matrix algebra the reader can quickly master and put this technique to immediate use

Regression with Dummy Variables Melissa A. Hardy, 1993-02-25 It is often necessary for social scientists to study differences in groups such as gender or race differences in attitudes buying behavior or socioeconomic characteristics When the researcher seeks to estimate group differences through the use of independent variables that are qualitative dummy variables allow the researcher to represent information about group membership in quantitative terms without imposing unrealistic measurement assumptions on the categorical variables Beginning with the simplest model Hardy probes the use of dummy variable regression in increasingly complex specifications exploring issues such as interaction heteroscedasticity multiple comparisons and significance testing the use of effects or contrast coding testing for curvilinearity and estimating a piecewise linear regression

Land Constraints and Agricultural Intensification in Ethiopia Derek Headey, Mekdim Dereje, Jacob Ricker-Gilbert, Anna Josephson, Alemayehu Seyoum Taffesse, 2013-09-13 Highland Ethiopia is one of the most densely populated regions of Africa and has long been associated with both Malthusian disasters and Boserupian agricultural intensification This paper explores the race between these two countervailing forces with the goal of informing two important policy questions First how do rural Ethiopians adapt to land constraints And second do land constraints significantly influence welfare outcomes in rural Ethiopia To answer these questions we use a recent household survey of high potential areas We first show that farm sizes are generally very small in the Ethiopian highlands and declining over time with young rural households facing particularly severe land constraints We then ask whether smaller and declining farm sizes are inducing agricultural intensification and if so how We find strong evidence in favor of the Boserupian hypothesis that land constrained villages typically use significantly more purchased input costs per hectare and more family labor and achieve higher maize and teff yields and high gross income per hectare However although these higher inputs raise gross revenue we

find no substantial impact of greater land constraints on net farm income per hectare once family labor costs are accounted for Moreover farm sizes are strongly positively correlated with net farm income suggesting that land constraints are an important cause of rural poverty We conclude with some broad policy implications of our results
