[Handbook of Research on Science Literacy Integration in Classroom Environments](#) Tai, Chih-Che, Moran, Renee M. R., Robertson, Laura, Keith, Karin, Hong, Huili, 2018-10-12 Secondary schools are continually faced with the task of preparing students for a world that is more connected, advanced, and globalized than ever before. In order to adequately prepare students for their future, educators must provide them with strong reading and writing skills, as well as the ability to understand scientific concepts. The *Handbook of Research on Science Literacy Integration in Classroom Environments* is a pivotal reference source that provides vital research on the importance of cross-curriculum discipline connections in improving student understanding and education. While highlighting topics such as curriculum integration, online learning, and instructional coaching, this publication explores practices in teaching students how to analyze and interpret data, as well as reading, writing, and speaking. This book is ideally designed for teachers, graduate-level students, academicians, instructional designers, administrators, and education researchers seeking current research on science literacy adoption in contemporary classrooms.

The Future of Ubiquitous Learning Begoña Gros, Kinshuk, Marcelo Maina, 2015-07-28 This book explores emerging pedagogical perspectives based on the design of new learning spaces supported by digital technologies and brings together some of the best research in this field. The book is divided into three themes: foundations of emerging pedagogies, learning designs for emerging pedagogies, and adaptive and personalized learning. The chapters provide up-to-date information about new pedagogical proposals and examples for acquiring the requisite skills to both design and support learning opportunities that improve the potential of available technologies.
