The Doctorate Blueprint Alessio

Malizia,2025-08-05 The doctorate process can seem complicated and daunting in a young academic's career. Whether you are starting your doctoral studies or planning your next steps, this guide offers clear, actionable advice for success in academia and beyond. **The Doctorate Blueprint** is a practical guide designed to help graduates and young academics in science and engineering navigate the complex journey of earning a PhD. The guide takes a comprehensive view of the doctorate process and covers all aspects from understanding research and choosing the right methods to writing a dissertation and getting published. The book also provides essential tools and advice on career planning, including how to write grant proposals and run a research lab. It serves as an essential companion for those beginning their doctoral journey, offering a clear roadmap from initial research to career planning beyond the PhD, with a focus on PhD candidates and advice for early career academics with little to no experience supervising students.

Proceedings of the 5th International Conference on AI Research Renata Paola Dameri, The International Conference on AI Research (ICAIR) is becoming a key forum for academics and students. Whether social scientists, natural scientists, or philosophers, they come together to explore the future of society in the context of AI. Many aspects of AI are now the subject of peer-reviewed academic research, including the increasing use of Chatbots and GenAI in academe and in society at large. The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics. After a successful inaugural event in Oxford, the conference fell victim to Covid, and the following three years were held online. Time was taken in 2023 to refocus this fast-developing area of research, and the name of the conference was changed this year to the International Conference on Artificial Intelligence. The Proceedings of the 2025 edition of the conference include academic research papers, PhD research papers, Masters Research papers, and work-in-progress papers, all of which have been presented and discussed at the ICAIR 2025 conference. The proceedings are of an academic level appropriate to a professional research audience, including graduates, postgraduates, doctoral, and post-doctoral researchers. All papers have been double-blind peer-reviewed by members of the Review Committee.

Virtual, Augmented and Mixed Reality Jessie Y. C. Chen, Gino Fragomeni, 2025-05-30 This three-volume set LNCS 15788, 15790 constitutes the refereed proceedings of the 17th International Conference on Virtual, Augmented, and Mixed Reality (VAMR 2025), held as part of the 27th International Conference on Human-Computer Interaction (HCI 2025) in Gothenburg, Sweden, during June 22-27, 2025. The total of 1430 papers and 355 posters included in the HCI 2025 proceedings were carefully reviewed and selected from 7972 submissions. The papers presented in these three volumes are organized in the following topical sections: Part I: Designing and Developing Virtual Environments; UX in Virtual Environments; Part II: VR Culture, Art, and Entertainment; Social Interaction and Wellbeing in Virtual Environments; Part III: VR Games; Virtual Environments for Learning, Training, and Professional Development; Multimodal Interaction in Virtual Environments.

Handbook of Design and Industry Maria João Félix, Rita Assoreira Almendra, Fernando Moreira da Silva, Fátima Pombo, Paulo Jorge de Sousa Cruz, 2025-09-30 The twenty-first century has been beset by a global pandemic war and

increasingly concerning environmental disasters Designers and industries have been forced to imagine a world in which the only way to move forward is to look back The design and industry sectors need to understand the role they can play in removing obstacles to social progress and work together to create healthier human societies that can interact with the world in a sustainable way This book presents contributions from leading experts that reveal that a better and more prosperous world is achievable through good work and system design This book consists of chapters that bring together researchers academics policy makers and designers from technology companies and business associations with the objective of developing a focused vision that enhances innovation through design and industry for a better future Through a transdisciplinary scientific exchange it lists responses to the challenges of climate change and environmental degradation that will contribute to a more modern resource efficient competitive economy with smart sustainable and inclusive growth promoting knowledge inter sector collaboration health education and a digital society for all By putting the human at the heart of what can be accomplished this book investigates better design in the disciplines of work healthcare product system manufacturing and industry The reader will gather an interdisciplinary perspective on what good design can achieve and why it is needed to challenge the climate crisis The Handbook of Design and Industry Scenarios for Sustainable Futures is essential reading for researchers and academics in the fields and disciplines of ergonomics human factors occupational health and safety industrial design product design industrial engineering materials engineering process engineering computer engineering communication design electronics and telecommunications engineering

Artificial Intelligence in Creative Industries Francisco Tigre Moura, Caterina Moruzzi, 2026-03-17 While technological innovation has long reshaped artistic and cultural practices the rise of generative AI Gen AI represents an unprecedented disruption due to its scale speed and capacity to produce outputs that can rival and surpass human creativity This edited book examines how AI is transforming creativity redefining industries and raising new questions of authenticity originality and human agency Specifically it focuses on psychological and social implications of the GenAI revolution in creative fields The collection brings together seventeen chapters by international scholars from psychology sociology marketing cultural studies education and related fields These contributions provide theoretical conceptual and empirical insights into how creativity is being redefined across multiple sectors contributing to the development of a new paradigm for understanding creative industries in the age of AI Each chapter concludes with research questions to stimulate classroom debate inspire research proposals and guide further inquiry It thus serves both as a teaching resource for seminars and workshops and as a reference for postgraduate research projects and scholarly collaboration The book is designed primarily for academics higher education students and instructors working on the intersection of AI creativity arts and management

Artificial Intelligence in Patient Counselling Bhupendra G. Prajapati, Meghraj Vivekanand Suryawanshi, Jigna Prajapati, Nemat Ali, 2025-11-08 Artificial Intelligence in Patient Counselling explores the transformative role of artificial intelligence in enhancing patient counseling

and education The book delves into how cutting edge AI technology is reshaping the healthcare landscape improving patient experiences and driving better health outcomes It provides a comprehensive overview of the ways AI can address the challenges of personalized and effective patient care Sections cover a wide range of topics including the creation of personalized treatment plans through AI s analysis of patient data the emergence of AI powered virtual health assistants for 24 7 support and the use of predictive analytics to identify early disease progression Additionally it explores AI enhanced medical imaging empathetic AI chatbots ethical considerations and real world case studies that illustrate the tangible benefits of AI in patient counseling and education By offering insights from leading experts it empowers readers to navigate the evolving healthcare landscape with confidence and compassion The book provides essential knowledge and tools for improving patient outcomes and modernizing patient care through AI driven solutions making it a valuable resource for understanding the impact of AI on patient care and education Delves into how AI analyzes patient data including medical histories genetics and lifestyles to create tailored treatment plans Highlights the role of AI driven virtual health assistants and chatbots that provide 24 7 support empathetic conversations and proactive counseling Discusses the ethical implications of using AI in healthcare Presents real world case studies that illustrate the practical benefits and challenges of AI in patient counseling and education *The APDalog* ,1990 **PC AI** ,1991 THE Journal ,2001 Scientific American ,1873
