Cornes and Lupton's Design Liability in the Construction Industry Sarah Lupton, 2013-12-31 Liability for the design of a building or structure is of fundamental concern to construction professionals design build contractors specialist sub contractors and lawyers Although other texts cover a wide range of aspects of liability only Cornes and Lupton s Design Liability in Construction draws together all those matters that relate specifically to design A number of factors have come together recently and are addressed in this significant update and rewrite of the 4th edition including popularity of design build procurement partnering arrangements and early contractor involvement new standard forms of construction contract and appointment and revisions to older forms technical innovations in construction collaborative working and BIM systems many well publicised cases regarding design failures significant developments in the law of tort and professional liability the development of the single European market and increased provision of services overseas Together these factors create a new range of design liability issues which the construction professional has to face Written for lawyers architects engineers and contractors the fifth edition of Design Liability in Construction will also serve as a useful text for masters level courses in engineering surveying and construction law

Private Law and Building Safety Matthew Bell, Susan Bright, Ben McFarlane, Andrew Robertson, 2025-07-24 This collection of essays explores the real world problem of building safety through the lens of private law High profile building failures including the fire at Grenfell Tower London England and the collapse of Champlain Towers South Florida USA have exposed widespread building safety failures globally In this book international experts deploy a variety of different private law perspectives ranging through torts contract and real property law to examine building safety failures across the UK USA Australia Singapore New Zealand Italy and Canada The book offers policymakers practitioners and scholars ground breaking consideration of this vital yet under considered aspect of the building safety crisis along with new and valuable insights into the nature limits and utility of private law The book shows that private law can be part of the solution to as well as being part of the cause of the building safety crisis Consideration is given to existing legislative and judicial responses to the crisis offering guidance as to how statutory regimes addressing the building safety problem such as the Building Safety Act 2022 can best be understood and developed A central lesson is the need to take an integrated coherent approach within and beyond private law The book also illustrates that an understanding of the causes of and responses to the building safety crisis is vital to any theory of private law private law is unable to fulfil its distinctive and crucial role of ordering our relations one to another if we adopt an unduly limited view of the reasons and resources available to it The book results from a joint research project by the Faculty of Law at the University of Oxford and Melbourne Law School at the University of Melbourne
