Description :

Build your fundamental helping skills, and more important, the ability to transfer those skills to actual real-world situations with the unique approach found in Chang/Scott/Decker's **DEVELOPING HELPING SKILLS: A STEP BY STEP APPROACH**. These experienced authors have created a blend of learning methods and clear presentations throughout this text and integrated DVD that help readers at any level think like practitioners and appropriately apply foundational skills. Self-assessment, critical thinking, and practice play a central role in the book's presentation as the text prepares professionals in training for generalist practice with individuals, families, and groups, including entire communities and organizations. Whether you are preparing for social work, psychology, counseling, marriage and family therapy, pastoral counseling, human services, or a related helping profession, this unique book offers the fundamental knowledge and skills sets you need. The authors' multilayered learning system, unlike any other text on the market, integrates reading, discussion, observation and visualization, practice, and evaluation. You begin by reading the text and completing the homework exercises that follow each new concept. You then view the accompanying DVD to see how to apply the skills in practice effectively. The text's case-based approach helps you think like a professional with a continuing case that is introduced one section at a time. Finally, role playing in practice interviews and completing evaluation tools allow you to assess progress and determine your personal readiness to apply your skills within actual life settings.

Developing Helping Skills Valerie Nash Chang, Sheryn Thompson Scott, Carol L. Decker, 2013

Developing Helping Skills Valerie Nash Chang, Carol Decker, Sheryn Thompson Scott, 2012-02-01 Chang Scott and Decker's multilayered teaching and learning system presents a creative blend of learning methods and clear presentation of topics to help students think like practitioners and apply foundational skills to real world practice. Students first read about professional practice and the skills required to work effectively with clients. Students then think and write about the ideas and concepts presented in the text by completing homework exercises following each new concept. Next, students watch and discuss the accompanying DVD available for packaging with the text, which demonstrates how to use the skills covered in the text with an individual family or group. Furthermore, the text's modified case-based method introduces a continuing case one section at a time throughout the chapters, which helps students learn how to think like professionals. Finally, exercises with specific directions for role playing the client, practitioner, and peer supervisor, followed by a simple evaluation tool completed by the peer supervisor and practitioner, promote practice and evaluation.

Wiesner, 2009-05-18 Autism is in the public spotlight now more than ever as new research and information appears almost daily Although in many ways this is a positive development it also presents challenges to families and practitioners who want to keep up with the latest developments and are left to sift through new information by themselves to see what is credible and relevant for them Each of us needs a personal research assistant who can determine which information we need to pay attention to and let us know how it might affect our daily work and the children we are living with or serve Since we each don't have our own research assistants on staff I am delighted to recommend this wonderful book by Fred Volkmar and Lisa Wiesner Both of these talented professional leaders have combined their scientific skills and understanding of the field with great practical experience and ideas about how research can be translated into clinical practice The result is a book that provides the best and most comprehensive information about recent scientific developments and a splendid practical guide for how they are being implemented and what we are learning in the process The issues are presented in all of their complexity but translated into language that is clear direct and easy to follow The format also lends itself to understanding the complex issues and their implications through excellent charts question and answer sections and chapters that vary from describing diagnostic issues to stating very specifically how to expand and evaluate the services one is receiving The comprehensive references and lists of additional resources also add greatly to the overall package As a professional dedicated to understanding scientific advances and helping families and teachers to utilize them most effectively I am very pleased to have an ally like this book available I am very grateful to the
