

CIM

CLASSICS IN MATHEMATICS

Springer-Verlag began publishing books in high mathematics in 1920, when the series *Grundlehren der mathematischen Wissenschaften* (usually conceived as a series of advanced textbooks, now founded by Richard Courant). A few years later a new series *Ergebnisse der Mathematik und ihrer Grenzgebiete*, survey reports of recent mathematical research, was added.

Of over 400 books published in these series, many have become recognized classics and remain standard references for their subject. Springer is reissuing a selected few of these highly successful books in a new, inexpensive softcover edition, making them easily accessible to younger generations of students and researchers.

Diffusion Processes and their Sample Paths (since its first publication in 1968) in the series *Grundlehren der mathematischen Wissenschaften* this book has had a profound and enduring influence on research into the stochastic process associated with diffusion phenomena. Generations of mathematicians have appreciated the clarity of the descriptions given of one- or more-dimensional diffusion processes and the mathematical insight provided into Brownian motion. Now, with its republication in the *Classics in Mathematics* it is hoped that a new generation will be able to enjoy the classic text of Itô and McKean.
