### **Challenges and Solutions in the Digital Economy and Finance**

Anna Rumyantseva, Vladimir Plotnikov, Alexey Minin, Hod Anyigba, 2022-11-04 This volume presents the proceedings of the 4th International Scientific and Practical Conference on Digital Economy and Finances DEFIN22 at the Saint Petersburg University of Management Technologies and Economics UMTE which took place in March 2022 It includes the newest research on the impact of new digital technologies on the growth and capitalization of companies and the labor market The volume discusses the problems of situational modeling of economic processes and the creation of digital twins of enterprises The contributions analyse how big data and artificial intelligence technologies are shaping the financial markets *The business model cycle* Sophia von Berg, 2020-12-17 Today firms all over the world have to deal with dynamic business environments Fast moving digitalization has made information more transparent strengthening the role of the customer At the same time the provider can have a much closer relationship with the user thanks to real time communication However corporate practice does not have a process for developing dynamic business models and user centric business models that can be designed and changed using smart technologies have not yet been systematically integrated To stay competitive companies need to rise to this challenge The aim of this dissertation was to develop a dynamic user centric process model for business model design and change and to evaluate the model s ability to maintain a competitive advantage in the mobility sector First the differences between static dynamic and user centric business models and their corresponding attributes were deduced Then these findings were combined into a process model using system dynamics logic This model considers the user a co creator of value and helps managers react to real time changes in their business model environment Finally a mobility sector case study is presented to highlight the relevance of this model to real world application This business model cycle

BMC supports the strategic management of dynamic user centric business model design and change activities It describes a step by step procedure of business model design that includes ideation prototyping and integration of business model options Moreover it allows continuous monitoring of the business model environment and adaption of the model accordingly At the same time bidirectional interaction between the user and provider is possible allowing the provider to adapt to their users needs The BMC is unique in that these processes can take place simultaneously Finally the real world case study in the mobility sector confirmed that using the BMC for strategic management maintains a lasting competitive business advantage

**Business Dynamics Models** Eugenius Kaszkurewicz,Amit Bhaya,2022-11-24 This book introduces optimal control methods formulated as optimization problems applied to business dynamics problems Business dynamics refers to a combination of business management and financial objectives embedded in a dynamical system model The model is subject to a control that optimizes a performance index and takes both management and financial aspects into account Business Dynamics Models Optimization Based One Step Ahead Optimal Control includes solutions that provide a rationale for the use of optimal control and guidelines for further investigation into more complex models as well as formulations that can also be used in a so called flight simulator mode to investigate different complex scenarios The text offers a modern programming environment Jupyter notebooks in JuMP Julia for modeling simulation and optimization and Julia code and notebooks are provided on a website for readers to experiment with their own examples This book is intended for students majoring in applied mathematics business and engineering The authors use a formulation algorithm example approach rather than the classical definition theorem proof making the material understandable to senior undergraduates and beginning graduates

**Value-Focused Business Process Engineering : a Systems Approach** Dina Neiger,Leonid Churilov,Andrew Flitman,2008-12-16 One of the keys to successful business process engineering is tight alignment of processes with organisational goals and values Historically however it has always been difficult to relate different levels of organizational processes to the strategic and operational objectives of a complex organization with many interrelated and interdependent processes and goals This lack of integration is especially well recognized within the Human Resource Management HRM discipline where there is a clearly defined need for greater alignment of HRM processes with the overall organizational objectives Value Focused Business Process Engineering is a monograph that combines and extends the best on offer in Information Systems and Operations Research Decision Sciences modelling paradigms to facilitate gains in both business efficiency and business effectiveness

**The Elgar Companion to Management Education and the Sustainable Development Goals** Tony Wall,Kemi Ogunyemi,Emanuela Girei,Maribel Blasco,Elena P. Antonacopoulou,Stella M. Nkomo,2026-01-14 This is an open access title available under the terms of a CC BY NC ND 4 0 License It is free to read download and share via Elgaronline com The United Nations Principles for Responsible Management Education PRME initiative has embraced and driven awareness of the 17 Sustainable Development Goals SDGs throughout business and

management schools across the globe Whilst promoting a common global framework for transitions progress continues to be deeply entangled with wider neo liberal structures which perpetuate economic advancement over equality equity and environmental justice Now the achievement of the SDGs through management education requires creative and pluralistic approaches that embrace both Global North and Global South perspectives taking into consideration differences in the challenges of sustainability and the on going geopolitical inequalities in resources and power

*Business Strategies for Sustainability* Helen Borland, Adam Lindgreen, Francois Maon, Véronique Ambrosini, Beatriz Palacios Florencio, Joelle Vanhamme, 2018-10-03 *Business Strategies for Sustainability* brings together important research contributions that demonstrate different approaches to business strategies for sustainability Many corporate initiatives toward what firms perceive to be sustainability are simply efficiency drives or competitive moves falling far short of actual strategies for ecological sustainability To suggest true ecological sustainability strategies this new research anthology adopts an interdisciplinary or transdisciplinary approach to discern what business strategies might look like if they were underpinned by environmental and ecological science The 23 chapters in this anthology reflect five main topic sections a delineating sustainability challenges and visions b contradiction integration and transformation of business and sustainability logics c innovating and developing strategic capabilities for sustainability d assessing and valuing sustainability and e toward multi level engagement and collaboration

*The Philosopher's Stone for Sustainability* Yoshiki Shimomura, Koji Kimita, 2012-09-26 Industrial Product Service Systems IPS2 which is defined as an integrated industrial product and service offering that delivers value in use has expanded rapidly over the last decade IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services We are now struggling with many awkward issues related to sustainability but IPS2 is expected to be the philosopher s stone for solving these issues Following the pattern of conferences held in Cranfield in 2009 Link ping in 2010 and Braunschweig in 2011 the fourth International CIRP Conference on Industrial Product Service Systems held on November 8 9 2012 in Tokyo will cover various aspects of IPS2 Topics planned for this year s conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries IPS2 is still a relatively new field so it is important to keep track of the entire context in order to promote more cross sectional cooperation between multimodal fields and disciplines The fourth International CIRP Conference on Industrial Product Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas

**OR/MS Today**, 2002 Autopoietic Knowledge Systems in Project-Based Companies Kaj U. Koskinen, 2010-10-14 All companies draw on resources outside the business and have to compete with other enterprises to attract these resources Standard texts on management and organization argue that the best way to get ahead in business is by getting a firm grasp of this external environment by representing it internally Kaj Koskinen claims that this is the wrong approach He argues that business knowledge doesn t just represent the world outside the company but is a construction of the company and the people working in it The success of a company depends less on how clearly it represents the external environment than on factors such as institutional memory a culture of trust and appropriate organizational mechanisms for learning In short the most successful companies are those which are what the author calls autopoietic knowledge systems In this book he presents a novel scheme for understanding knowledge creation and learning in project based enterprises He shows how autopoietic knowledge systems can be built and the benefits they can bring All scholars and students of knowledge management will benefit from the radical new approach to business organization presented in this book It will also be of great interest to knowledge managers looking to understand how they can drive their businesses forward
