Subject Theme And Agent In Modern Standard Arabic:

Subject, Theme and Agent in Modern Standard Arabic , Hussein Abdul-Raof,2013-10-28 Investigates the universal categories subject theme and agent with special reference to their functional status in Modern Standard Arabic MSA and how these three distinct functions may or may not coincide in Arabic sentences These functions are inexplicitly characterised by classical and modern Arab linguists and Arabists alike It has been found that the pre viz sentence initial or post verbal noun phrase NP in Arabic can be assigned the syntactic function subject but may not necessarily assume the semantic function agent that the pre verbal NP which may not necessarily be the subject has the pragmatic function theme and that these distinct functions sometimes cluster around a single NP in certain sentences depending on genre It has also been found that in MSA the order of sentence constituents is relatively free subject to a verb initial preference especially when needed to prevent ambiguity The present study reveals the fact that although coding features such as word order case marking and cross referencing viz agreement may provide a clear indication of which NPs are subjects in MSA they do not provide a clear cut indication of semantic relations such as agent the subject position in MSA is not necessarily the canonical agent position

Arabic Rhetoric Hussein Abdul-Raof,2006-09-27 Arabic Rhetoric explores the history disciplines order and pragmatic functions of Arabic speech acts It offers a new understanding of Arabic rhetoric and employs examples from modern standard Arabic as well as providing a glossary of over 448 rhetorical expressions listed in English with their translations which make the book more accessible to the modern day reader Hussein s study of Arabic rhetoric bridges the gap between learning and research whilst also meeting the academic needs of our present time This up to date text provides a valuable source for undergraduate students learning Arabic as a foreign language and is also an essential text for researchers in Arabic Islamic studies and students of linguistics and academics

Ani, Dilworth B. Parkinson, 1996 **Qur'anic Stylistics** Hussein Abdul-Raof, 2004 Stylistic variation is the colourful manifestation of language It is an intriguing linguistic phenomenon that can take place at different levels of language as it has been found in Qur'anic genre Stylistic shift can occur within the sentence boundary at both the micro and the macro levels In the micro text stylistic variation occurs at the morpheme word and sentence levels However in the macro text stylistic change can occur at the macro textual level beyond the sentence boundary In other words stylistically different sentences are found at different texts far away from each other Stylistic variation mirrors language behaviour and the manipulation of the linguistic tools and strategies available to the text producer Stylistic variation in Qur'anic Arabic occurs for a good reason and is context and co-text sensitive Context and co-text are the linguistic habitat for stylistic shift The surrounding grammatical semantic and phonetic environment has a direct impact upon the linguistic behaviour of Qur'anic genre This is due to the fact that the text unfolds in a given context of situation Therefore the distinctive stylistic patterns are influenced by the contextual and co-textual factors A linguistic stylistic exploration of sentence patterns illuminates the reader's appreciation of the grammatical and semantic subtleties underpinning the distinct meanings of two stylistically different but structurally identical sentences A linguistic investigation of the stylistic patterns of language also unearths the underlying signification of two stylistically distinct sentences The present analysis attempts to provide an insight into the resourceful stylistic and linguistic strategies of Arabic The book sharpens up the reader's awareness of the exotic stylistic patterns that are semantically oriented These

stylistic structures can be realized through various linguistic processes that are specific to Arabic. The resourceful mechanism can be a useful linguistic tool to achieve various communicative functions with different semantic significations.
