Superforecasting Philip Tetlock, Dan Gardner, 2015-09-29 **SUMMARY - Superforecasting: The Art And Science Of Prediction By Philip E. Tetlock And Dan Gardner** Shortcut Edition, 2021-06-05 Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes By reading this summary you will discover the art of making reliable and rigorous forecasts You will also discover that many experts give forecasts that are too vague and difficult to verify the field of forecasting is sorely lacking in rigorous evaluations the best forecasters rely on method and not on innate abilities any forecast must be supported by a numerical probability an assumption with clearly defined terms a good forecaster is rigorous intellectually humble and able to consider a multitude of perspectives In the media as well as in government forecasting plays a central role They have an impact on all the strategies of leaders A battery of influential experts is therefore constantly in demand But how reliable are their diagnoses Very competent people often make vague or even erroneous estimates On the other hand some less well known forecasters reveal surprising results Here

is their secret they don't have any particular gift but they do have a method Buy now the summary of this book for the modest price of a cup of coffee [SUMMARY Edition Shortcut \(author\), 1901](#) **Tetlock and Gardner's Superforecasting Summary** Ant Hive Media, 2016-04-23 This is a Summary of Tetlock and Gardner's New York Times Bestseller *Superforecasting: The Art and Science of Prediction* Everyone would benefit from seeing further into the future whether buying stocks, crafting policy, launching a new product, or simply planning the week's meals. Unfortunately, people tend to be terrible forecasters. As Wharton professor Philip Tetlock showed in a landmark 2005 study, even experts' predictions are only slightly better than chance. However, an important and underreported conclusion of that study was that some experts do have real foresight, and Tetlock has spent the past decade trying to figure out why. What makes some people so good? And can this talent be taught? In *Superforecasting*, Tetlock and coauthor Dan Gardner offer a masterwork on prediction, drawing on decades of research and the results of a massive government-funded forecasting tournament. The Good Judgment Project involves tens of thousands of ordinary people, including a Brooklyn filmmaker, a retired pipe installer, and a former ballroom dancer, who set out to forecast global events. Some of the volunteers have turned out to be astonishingly good. They've beaten other benchmarks, competitors, and prediction markets. They've even beaten the collective judgment of intelligence analysts with access to classified information. They are superforecasters. In this groundbreaking and accessible book, Tetlock and Gardner show us how we can learn from this elite group. Weaving together stories of forecasting successes, the raid on Osama bin Laden's compound, and failures like the Bay of Pigs, and interviews with a range of high-level decision makers from David Petraeus to Robert Rubin, they show that good forecasting doesn't require powerful computers or arcane methods. It involves gathering evidence from a variety of sources, thinking probabilistically, working in teams, keeping score, and being willing to admit error and change course. *Superforecasting* offers the first demonstrably effective way to improve our ability to predict the future, whether in business, finance, politics, international affairs, or daily life, and is destined to become a modern classic. Available in a variety of formats, this summary is aimed for those who want to capture the gist of the book but don't have the current time to devour all 352 pages.
