s just one problem most of them have never successfully invested their own money in individual stocks Their advice reflects their professional training and regulatory constraints not what actually works in the real world What if you approached stock investing differently After selling my accounting software business in 2013 I became a full time investor by necessity I didn't have formal financial training but I had something more valuable years of experience understanding what makes businesses succeed or fail I immersed myself in studying the methods of the world's greatest investors Warren Buffett Charlie Munger Peter Lynch and others who had actually built fortunes through stock investing I combined their wisdom with my own business experience to develop a practical approach that made sense in the real world The result Average annual returns of over 35% since 2013 This is the approach I share in *The Wrong Kind of Expert* In this book you'll discover Why conventional wisdom about diversification and index funds often leads to mediocre returns How to evaluate stocks the way successful business owners evaluate businesses by understanding what actually creates value The lessons from history's most successful investors and how to apply them today The real factors that determine whether a stock will rise or fall Why most professional investors underperform the market and what you can do differently How to avoid the psychological traps and emotional mistakes that destroy returns The critical difference between price and value and why this distinction is essential What to actually do with your money explained in plain English without jargon Real world examples of investment decisions and what they reveal about effective investing This isn't academic theory It's practical guidance from someone who's done it I don't manage other people's money I don't sell financial products I don't earn commissions on trades I have nothing to sell you except the information in this book the same approach that's built substantial wealth for me over the past decade The advice in these pages is fundamentally different from what you'll hear from financial professionals I learned from investors who actually made money not from textbooks written by academics I think about stocks as a business owner not as a finance professional calculating risk metrics Business owners think about value growth competitive advantages and long term prospects Financial professionals think about asset allocation risk adjusted returns and portfolio optimization One of these approaches consistently makes money The other keeps financial professionals employed Who this book is for This book is for intelligent people who want to take control of their investments but are tired of advice that seems designed to benefit everyone except the investor It's for people who can think independently and are willing to question conventional wisdom It's not a get rich quick scheme It's not day trading It's a thoughtful common sense approach to building wealth through stock investing the kind of approach that works when your own money is at stake If you're ready to think like a business owner and learn from investors who actually succeeded this book will show you how
