Gender in Music Production Russ Hepworth-Sawyer, Jay Hodgson, Liesl King, Mark Marrington, 2020-04-07 The field of music production has for many years been regarded as male dominated. Despite growing acknowledgement of this fact and some evidence of diversification it is clear that gender representation on the whole remains quite unbalanced. Gender in Music Production brings together industry leaders, practitioners and academics to present and analyze the situation of gender within the wider context of music production as well as to propose potential directions for the future of the field. This much anticipated volume explores a wide range of topics covering historical and contextual perspectives on women in the industry, interviews, case studies, individual position pieces as well as informed analysis of current challenges and opportunities for change. Ground breaking in its synthesis of perspectives, Gender in Music Production offers a broadly considered and thought provoking resource for professionals, students and researchers working in the field of music production today.

Applications of Research in Technology Education P. John Williams, Belinda von Mengersen, 2022-02-01 This book brings together significant international research in technology education through a focus on contemporary Ph D theses. It highlights the conceptual underpinnings and methodology of each research project and elaborates on how the findings are relevant for practitioners. This book addresses the common disjunction between research conducted and an awareness of that research by practitioners. It examines the extent to which the research aligns with different justifications for teaching technology in schools in economic, utilitarian, democratic, cultural and other such contexts.

Handbook of Research on Technology Tools for Real-World Skill Development Rosen, Yigal, Ferrara, Steve, Mosharraf, Maryam, 2015-10-19 Education is expanding to include a stronger focus on the practical application of classroom lessons in an effort to prepare the next generation of scholars for a changing world economy centered on collaborative and problem solving skills for the digital age. The Handbook of Research on Technology Tools for Real World Skill Development presents comprehensive research and discussions on the importance of practical education focused on digital literacy and the problem solving skills necessary in everyday life. Featuring timely research based chapters exploring the broad scope of digital and computer based learning strategies including but not limited to enhanced classroom experiences, assessment programs and problem solving training, this publication is an essential reference source for academicians, researchers, professionals and policymakers interested in the practical application of technology based learning for next generation education.
