[Information—Consciousness—Reality](#) James B. Glattfelder, 2019-04-10 This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age old enigmas of existence Over 300 years ago the human mind discovered the machine code of reality mathematics By utilizing abstract thought systems humans began to decode the workings of the cosmos From this understanding the current scientific paradigm emerged ultimately discovering the gift of technology Today however our island of knowledge is surrounded by ever longer shores of ignorance Science appears to have hit a dead end when confronted with the nature of reality and consciousness In this fascinating and accessible volume James Glattfelder explores a radical paradigm shift uncovering the ontology of reality It is found to be information theoretic and participatory yielding a computational and programmable universe **MAA Notes**, 1983

Formalization of Complex Analysis and Matrix Theory Zhiping Shi, Yong Guan, Ximeng Li, 2020-08-10 This book discusses the formalization of mathematical theories centering on complex analysis and matrix theory covering topics such as algebraic systems complex numbers gauge integration the Fourier transformation and its discrete counterpart matrices and their transformation inner product spaces and function matrices The formalization is performed using the interactive theorem

prover HOL4 chiefly developed at the University of Cambridge Many of the developments presented are now integral parts of the library of this prover As mathematical developments continue to gain in complexity sometimes demanding proofs of enormous sizes formalization has proven to be invaluable in terms of obtaining real confidence in their correctness This book provides a basis for the computer aided verification of engineering systems constructed using the principles of complex analysis and matrix theory as well as building blocks for the formalization of more involved mathematical theories
