Over the past 25 years the biennial ECPPM conference proceedings series has provided researchers and practitioners with a
unique platform to present and discuss the latest developments regarding emerging BIM technologies and complementary
issues for their adoption in the AEC FM industry Constructing Professional Discourse Concepción Orna-Montesinos,2012
This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the
ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides
a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the
communication practices and procedures of those communities In this respect the book offers a response to the claims made
by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland
2002 among others who have consistently defended the need for applied linguistic research into the textual generic and
social perspectives on the under researched interrelatedness of the discursual and professional practices of a discipline
Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain
specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the
theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological
engineering The book starts from the analysis of domain specific texts as final written products with specific lexico
grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to
the social context of production and interpretation of the text This integrative approach provides fresh new insights into the
way the processes of writing are affected by the community specific institutional and socio historical circumstances in which
domain specific texts are produced Subject Guide to Books in Print ,2001 American Book Publishing Record ,1998
