Translation Studies Susan Bassnett, 2002 In the late 1970s a new academic discipline was born Translation Studies We could not read literature in translation it was argued without asking ourselves if linguistic and cultural phenomena really were translatable and exploring in some depth the concept of equivalence When Susan Bassnett's Translation Studies appeared in the New Accents series it quickly became the essential introduction to this new subject Susan Bassnett tackles the crucial problems of translation and offers a history of translation theory beginning with the ancient Romans and encompassing key twentieth century structuralist work She then explores specific problems of literary translation through a close practical analysis of texts and completes her book with extensive suggestions for further reading Twenty years after publication the field of translation studies continues to grow Updated for the second time Susan Bassnett's Translation Studies remains essential reading for anyone new to the field

deconstructive thinking Kadiu presents practical ways of challenging theories that argue reflexivity is the only way of developing an ethical translation She questions the capacity of reflexivity to counteract the power relations at play in translation between minor and dominant languages for example and problematises affirmative claims about self knowledge by using translation itself as a process of critical reflection In exploring the interaction between form and content Reflexive Translation Studies promotes the need for an experimental multi sensory and intuitive practice which invites students scholars and practitioners alike to engage with theory productively and creatively through translation
