

"By using my book with Visual C++ 6.0, you'll learn to understand the fundamentals of the C++ language and learn to program for the real world."

First, I'll teach you C++ from your perspective, using the real examples for the language's fundamental constructs. Then, using your newfound C++ knowledge, I'll show you how to build applications using the Microsoft Foundation Classes. You'll learn how to use the ActiveX language library, the standard way to create controls.

It's a challenge, but you'll have great fun learning it. This is your first step into the world of real programming."
