Subject Clitics in the Northern Italian Dialects Cecilia Goria, 2012-11-02 1 0
INTRODUCTION This book provides an encompassing analysis of Subject Clitics SCLs by giving a detailed description of these elements in two varieties of Piedmontese a Northern Italian Dialect Astigiano and Turinese spoken in the areas of Asti and Turin respectively It accounts for the structural position and function of these elements inside the computational system

and for their morphological and distributional properties It also provides an empirical and theoretical comparison between Piedmontese SCLs and SCLs in other Northern Italian Dialects NIDs of SCLs types in the NIDs have been regarded as Since the 1980s the majority elements of agreement in that they contribute to the realisation of subject verb agreement by expressing features of the subject similar in a way to verbal inflection Nonetheless SCLs are not to be assimilated to verbal affixes as they exhibit different properties Most distinctively they can be separated from the verb by other clitic elements and in the case of the varieties considered here SCLs are optional in all contexts and may be omitted in coordination A more refined identification of SCLs separates SCLs which encode agreement features from those which do not and are related to pragmatic factors as originally observed by Benincà 1994 with respect to the clitic *a* in Paduano The different morphological and syntactic properties that characterise SCLs across the NIDs have justified numerous accounts which regard them as head of their own projection

A Comparative Grammar of Borgomanerese Christina Tortora, 2014 This book treats the morphosyntax of Borgomanerese a Northern Italian dialect The rich description of the many unusual features of this dialect some of which have not been previously reported in the literature gives rise to a number novel theoretical analyses advancing our understanding of syntax and syntactic theory

Information Structure and Its Interfaces Lunella Mereu, 2009 This series consists of collected volumes and monographs about specific issues dealing with interfaces among the subcomponents of linguistic structure phonology morphology phonology syntax syntax semantics syntax morphology and syntax lexicon Recent linguistic research

has recognized that the subcomponents of grammar interact in non trivial ways What is currently under debate is the actual range of such interactions and their most appropriate representation in grammar and this is precisely the focus of this series Specifically it provides a general overview of various topics by examining them through the interaction of grammatical components The books function as a state of the art report of research **Working Papers in Scandinavian Syntax** ,2006
