

Part I: Multiple Choice. Circle the letter corresponding to the best answer.

- A significance test was performed to test the null hypothesis $H_0: p = 0.5$ versus the alternative $H_a: p > 0.5$. The test statistic is $z = 1.40$. Which of the following is closest to the P -value for this test?
 - 0.0808
 - 0.1492
 - 0.1616
 - 0.2984
 - 0.9192
- The mean time it takes for a person to experience pain relief from aspirin is 25 minutes. A new ingredient is added to help speed up relief. Let μ denote the mean time to obtain pain relief with the new product. An experiment is conducted to verify if the new product works more quickly. What are the null and alternative hypotheses for the appropriate test of significance?
 - $H_0: \mu = 25$ vs. $H_a: \mu \neq 25$
 - $H_0: \mu = 25$ vs. $H_a: \mu < 25$
 - $H_0: \mu < 25$ vs. $H_a: \mu = 25$
 - $H_0: \mu < 25$ vs. $H_a: \mu > 25$
 - $H_0: \mu = 25$ vs. $H_a: \mu > 25$
- A test of $H_0: \mu = 60$ versus $H_a: \mu \neq 60$ produces a sample mean of $\bar{x} = 58$ and a P -value of 0.04. At an $\alpha = 0.05$ level, which of the following is an appropriate conclusion?
 - There is sufficient evidence to conclude that $\mu < 60$.
 - There is sufficient evidence to conclude that $\mu = 60$.
 - There is insufficient evidence to conclude that $\mu = 60$.
 - There is insufficient evidence to conclude that $\mu \neq 60$.
 - There is sufficient evidence to conclude that $\mu \neq 60$.
- Because t procedures are robust, the most important condition for their use is
 - the population standard deviation is known.
 - the population distribution is approximately Normal.
 - the data can be regarded as a random sample from the population.
 - np and $n(1 - p)$ are both at least 10.
 - all values in the sample are within two standard deviations of the mean.
- We want to test $H_0: \mu = 1.5$ vs. $H_a: \mu \neq 1.5$ at $\alpha = 0.05$. A 95% confidence interval for μ calculated from a given random sample is (1.4, 3.6). Based on this finding we
 - fail to reject H_0 .
 - reject H_0 .
 - cannot make any decision at all because the value of the test statistic is not available.
 - cannot make any decision at all because the distribution of the population is unknown.
 - cannot make any decision at all because (1.4, 3.6) is only a 95% confidence interval for μ .

STUDYING FOR YOUR AP EXAMINATION

It is never too early to start studying The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material It is very important for you to choose the time and place for studying that works best for you Some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep Other students may study during the day while waiting on a line or even while eating lunch Only you can determine when and where your study time will be most effective But be consistent and use your time wisely Work out a study routine and stick to it When you take the practice exams try to make your testing conditions as much like the actual test as possible Turn your television and radio off and sit down at a quiet table free from distraction Make sure to time yourself Complete the practice tests score your tests and thoroughly review the explanations for the questions you answered incorrectly However do not review too much during any one sitting Concentrate on one problem area at a time by reviewing the question and explanation and by studying our reviews until you are confident that you completely understand the material Since you will be allowed to write in your test booklet during the actual exam you may want to write in the margins and spaces of this book when practicing However do not make miscellaneous notes on your answer sheet Mark your answers clearly and make sure the answer you have chosen corresponds to the question you are answering Keep track of your scores This will enable you to gauge your progress and discover general weaknesses in particular sections You should carefully study the reviews that cover the topics causing you difficulty as this will build your skills in those areas To get the most out of your studying time we recommend that you follow the Study Schedule It details how you can best budget your time

TEST TAKING TIPS

Although you may be unfamiliar with tests such as the Advanced Placement exams there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Listed below are ways to help yourself become accustomed to the AP exam some of which may also be applied to other standardized tests Become comfortable with the format of the AP Examination in Statistics When you are practicing to take the exams simulate the conditions under which you will be taking the actual tests You should practice under the same time constraints as well Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently Know the directions and

format for each section of the exam Familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the AP exam to avoid anxiety and the mistakes caused by being anxious Work on the easier questions first If you find yourself working too long on one question make a mark next to it in your test booklet and continue After you have answered all of the questions that you can go back to the ones you have skipped Use the process of elimination when you are unsure of an answer If you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess If you cannot eliminate at least three of the answer choices you may choose not to guess as you will be penalized one quarter of a point for every incorrect answer Questions not answered will not be counted Be sure that you are marking your answer in the oval that corresponds with the correct item in the test booklet Since the multiple choice section is graded by machine marking the wrong answer will throw off your score
