Greg Caldwell,2021-01-29 Have you ever tried your hand at software development only to find out that it s much harder than you prepared for Not only do you have to make sure that your skills are up to par with everybody else but there is also the matter of coordinating with everyone involved in that project And with Collaboration comes the potential for complexity Soon enough you ll be juggling different deadlines and correspondences deal with differences in design approaches and wade through deep technical problems Aside from that you d have to deal with pressure from investors and stakeholders whose visions your team is trying to translate into something tangible but often get blindsided by last minute committee decisions Now what if you are open to a more agile method of managing projects but find changes in your results to be insignificant For instance you might have adopted methodologies like Scrum and XP but find your team of going through the motions of
