An Introduction to Second Language Acquisition Research Diane Larsen-Freeman, Michael H. Long, 2014-09-25 Understanding how people learn and fail to learn second and foreign languages

is increasingly recognised as a critical social and psycholinguistic issue. Second languages are vitally important to diverse groups of people ranging from refugees to college students facing foreign language requirements. This book provides a synthesis of empirical findings on second and foreign language learning by children and adults, emphasising the design and execution of appropriate research. *Research Methods in Generative Second Language Acquisition* Roumyana

Slabakova, Tania Leal, Laura Domínguez (Linguist), 2024-08. This timely text provides a comprehensive overview of the research methods used by the Generative Second Language Acquisition framework. **Approaches and Methods in**

French Second Language Acquisition Research Martin Howard, 2025. Against the backdrop of the critical importance of recognising the specificity of learning languages other than English, L2Es in Second Language Acquisition (SLA) research, this volume focuses on a state-of-the-art presentation of the research approaches and methods that characterise French as second language (L2) within contemporary SLA research. The presentation problematises those approaches and methods as a critique of what has been done, identifying a methodological roadmap of what needs to be done in order to advance the methodological agenda in L2 French and its contribution to wider SLA research. The discussion further aims to bridge the interface between methodological issues and the research investigation of a specific L2E, French, such as in terms of its linguistic characterisation and developmental issues underpinning its acquisition. The analysis extends to approaches and methods across different theoretical paradigms in L2 French in different areas of linguistic development among learners in different learning contexts. *Research Methods in Second Language Psycholinguistics* Jill Jegerski, Bill

VanPatten, 2013-12-17. Addressing a rapidly growing interest in second language research, this hands-on text provides students and researchers with the means to understand and use current methods in psycholinguistics. With a focus on the actual methods, designs, and techniques used in psycholinguistics research as they are applied to second language learners, this book offers the practical guidance readers need to determine which method is the best for what they wish to investigate, as well as the tools that will enhance their research. Each methods chapter is written by a leading expert who describes, discusses, and comments on how a method is used and what its strengths and limitations are for second language research. These chapters follow a specific format to ensure cohesion and a predictable structure across all chapters. The chapters also inform the novice researcher on such key issues as ease of use, costs, potential pitfalls, and other related matters, each of which impact decisions that researchers make about the paths they take. With the most reliable information available from experienced researchers, *Research Methods in Second Language Psycholinguistics* is an essential resource for anyone interested in conducting second language research using psycholinguistic methods. **Approaches to Research in Second Language Learning** Donna M. Johnson, 1991. Examines six major approaches to second language learning in the classroom.
