Internal Combustion Engine Division. Technical Conference, 2001 **Powertrain Systems for Net-Zero Transport** Institution of Mechanical Engineers (IME), 2021-12-23 The transport sector continues to shift towards alternative powertrains particularly with the UK Government's announcement to end the sale of petrol and diesel passenger cars by 2030 and increasing support for alternatives Despite this announcement the internal combustion continues to play a significant role both in the passenger car market through the use of hybrids and sustainable low carbon fuels as well as a key role in other sectors such as heavy duty vehicles and off highway applications across the globe Building on the industry leading IC Engines conference the 2021 Powertrain Systems for Net Zero Transport conference 7 8 December 2021 London

UK focussed on the internal combustion engine's role in Net Zero transport as well as covered developments in the wide range of propulsion systems available electric fuel cell sustainable fuels etc and their associated powertrains To achieve the net zero transport across the globe the life cycle analysis of future powertrain and energy was also discussed Powertrain Systems for Net Zero Transport provided a forum for engine fuels e machine fuel cell and powertrain experts to look closely at developments in powertrain technology required to meet the demands of the net zero future and global competition in all sectors of the road transportation off highway and stationary power industries
