Krusty Krabs Breath Mints

Mr. Krabs created a secret ingredient for a breath mint that he thinks will "cure" the bad breath people get from eating crabby patties at the Krusty Krab. He asked 100 customers with a history of bad breath to try his new breath mint. He had 50 customers (Group A) eat a breath mint after they finished eating a crabby patty. The other 50 customers (Group B) also received a breath mint after they finished the sandwich, however, it was just a regular breath mint and did not have the secret ingredient. Both groups were told that they were getting the breath mint that would cure their bad breath. Two hours after eating the crabby patties, 30 customers in Group A and 10 customers in Group B reported having better breath than they normally had after eating crabby patties.

1. Which group of people were in the control group? **Group without the secret ingredient, group B**
2. What is the independent variable? **The secret ingredient**
3. What is the dependent variable? **Fresh breath**
4. What do you think Mr. Krabs' conclusion should be? **The secret ingredient helps people to have fresh breath**
5. Give examples/details that support why you think in #4 what Mr. Krabs' conclusion should be. **30 out 50 people from group A had fresh breath but only 10 out 50 people from group B did**
