Creech,2013 Hong Kong Media Law Doreen Weisenhaus,2014-05-01 This second edition of Hong Kong Media Law is an authoritative guide to the laws most important to reporters editors news executives and other professionals working for the print online and broadcast media and the lawyers who advise them Topics include defamation court reporting privacy access to information copyright newsgathering and reporting restrictions The book also examines legal hurdles Hong Kong and international journalists face while reporting on the mainland of the People s Republic of China Also featured are chapter FAQs and checklists a glossary of legal terms a research guide and key legislation texts Mass Media Law and Regulation William E. Francois,1986 Written for journalism students by a journalist this textbook seeks to introduce the newcomer to mass media law without confusing him with minute legal technicalities A number of new developments have been discussed in this new edition new information on the drafting process that led to the wording of the First Amendment additional insights into the meaning of the Press Clause of that Amendment the much publicized lawsuits brought by Israel s former Defense Minister Ariel Sharon against Time and the defamation action filed by retired Army General William C Westmore land against CBS The book also presents viewpoints in the debate on the First freedom guaranteed by the Bill of Rights ISBN 0 471 81856 9 34 95 **Media Law in the time of liquid modernity** Jacek Sobczak,Jedrzej Skrzypczak,Ksenia Kakareko,2017 Political and social changes that took place at the turn of the 20th and 21st centuries and additionally technological revolution and the process of digitalisation have resulted in significant social economic and legal transformations Then it can be even said metaphorically that together with the development of the Internet we discovered a new continent Colonization of this area resembles conquering new areas in

times of great geographical discoveries At first power and violence were prevailing and only later people tried to introduce effective methods of law enforcement Nowadays the next problem is the non territoriality of phenomena on the Internet From the point of view of legal actions it is generally limited to a legal system of a given country and seems to be a fundamental issue As it appears law and legal systems do not handle the challenges of global space and it is rather a gunslinger s speed that turns out to be essential here However it should be hoped that with time as in the case of the real world experience power will be replaced with powerful arguments based on effective legal mechanisms in particular All the more so as these changes happen very rapidly Thus referring to the known concept of liquid modernity by Zygmunt Bauman it can also be said that by regulating the media subject in the field of law to fundamental changes we are confronted with the uncertainty of legal institutions concerning this part of social life Hence we should return to the basics and again pose fundamental questions about media law such as for instance what should the press radio television be called and who can be treated as a journalist Additionally we should face new legal phenomena and challenges The collective work we are passing to the readers is an attempt to analyse the current state and present a forecast about further changes as well as answers to at least several questions posed above Being aware of the fact that it is impossible to deal with or even settle all the aforementioned problems in such a study the editors hope that thanks to reviews and deliberations of the authors the book will significantly contribute to the discussion on media law in the 21st century The authors of individual chapters of this book are researchers from various Polish scientific institutions and members of the Polish PressLawAssociation
