Digital Detox Victor de la Fuente,2022-06-02 Digital Detox is a book born out of the need to reclaim control over our time and attention We live surrounded by screens notifications and stimuli that demand our focus at every moment And while technology offers us infinite possibilities it also drags us into a state of stress and overload that erodes our concentration our calm and at times even our very perception of time and identity This book does not propose renunciation but rather reconnection It invites us to take a conscious look at our relationship with the digital world from smartphones to social media with both its light and its shadows and encourages us to chart a path toward a more human balance Through a simple and gradual detox process the author shows us how to identify the habits that distract us how to set boundaries that protect us and how to transform technology into a tool at our service instead of becoming instruments of technology The reading goes beyond practical advice though it includes it it is also a guide toward a new way of being present and toward understanding the importance of the crossroads we face Regaining mental calm in a hyperconnected world does not mean fleeing from technology but learning to live with it consciously instead of living on autopilot Digital Detox rethinks our relationship with the world A guide for those who want to harness technology without losing what matters most the ability to choose to focus and to live with serenity amid the noise

at least in their regions Settlements began to grow People began to settle down to an agriculturalist style of living instead of going in for the Hunter lifestyle followed by their ancestors Their Hunter ancestors 10 000 years ago and ours perhaps 25 000 years ago and more were not bothered much about gathering plenty of physical and material belongings to them The concept of your and mine was not a common thing at that time Nevertheless they knew that they needed some basic materials to survive These included clothing hunting weapons and shelter Utensils they could do without because all they needed was to have any hollow space available and there they were they could cook the food hunted during the day and next day move their camps to other hunting grounds But as human beings began to settle down and began making permanent places in which to live there began a steady search for knowledge and the expansion of mankind s creative and artistic sensibilities That is when the concept of Your and Mine came into existence The instinct of possessing something which was not easily available or which was just the possession of one particular person began to crop up in the lives of human beings And that brought with it sorrow jealousy envy greed and all the other negative emotions which unfortunately are parts of our lives today An Approach to the Evaluation of Expert Systems for the Selection of Reference Sources Shiao-Feng Su,1994
