Diana Stuart Sinton, Jennifer J. Lund, 2007 This collection of case studies describes how instructors have used GIS within the traditions of a classical undergraduate education to help students analyze, manage, and visualize information in order to create a realistic learning environment in which students practice inquiry in their fields **Database and Expert Systems**

**Applications** A Min Tjoa, Isidro Ramos, 2012-12-06 The Database and Expert Systems Application DEXA conferences are mainly oriented to establish a state of the art forum on Database and Expert System applications. But Practice without Theory has no sense as Leonardo said five centuries ago. In this Conference we try a compromise between these two complementary aspects. A total of 5 sessions are application oriented ranging from classical applications to more unusual ones in Software Engineering. Recent research aspects in Databases such as activity deductivity and or Object Orientation are also present in DEXA 92 as well as the implication of the new data models such as OO Model, Deductive Model etc included in the Modelling sessions. Other areas of interest such as Hyper Text and Multimedia application together with the classical field of Information Retrieval are also considered. Finally Implementation Aspects are reflected in very concrete fields. A total of nearly 200 papers submitted from all over the world were sent to DEXA 92. Only 90 could be accepted. A Poster session has also been established. DEXA 90 was held in Vienna Austria, DEXA 91 in Berlin Germany and DEXA 92 will take place in Valencia Spain where we are celebrating the discovery of the New World just five centuries ago in Leonardo's age. Both the quality of the Conference and the compromise between Practice and Theory are due to the credit of all the DEXA 92 authors.

Interactive Search Processes in Complex Work Situations - A Retrieval Framework Raiko Eckstein, 2011 Post-Imperial Perspectives on Indigenous Education Peter Anderson, Koji Maeda, Zane M. Diamond, Chizu Sato, 2020-10-05 This book explores the impact of the United Nations Declaration on the Rights of Indigenous Peoples in Japan and Australia where it has heralded change in the rights of Indigenous Peoples to have their histories, cultures, and lifeways taught in culturally appropriate and respectful ways in mainstream education systems. The book examines the impact of imposed education on Indigenous Peoples, pre-existing education values and systems, considers emergent approaches towards Indigenous education in the post-imperial context of migration, and critiques certain professional development, assessment, pedagogical approaches, and curriculum developments. This book will be of great interest to researchers and lecturers of education specialising in Indigenous Education as well as postgraduate students of education and teachers specialising in Indigenous Education.

**Information Discovery on Electronic Health Records** Vagelis Hristidis, 2009-12-10 Exploiting the rich information found in electronic health records (EHRs) can facilitate better medical research and improve the quality of medical practice. Until now a trivial amount of research has been published on the challenges of leveraging this information. Addressing these challenges, *Information Discovery on Electronic Health Records* explores the technology to unleash the data stored in EHRs. Assembling a truly interdisciplinary team of experts, the book tackles medical privacy concerns, the lack of standardization for

the representation of EHRs missing or incorrect values and the availability of multiple rich health ontologies It looks at how to search the EHR collection given a user query and return relevant fragments from the EHRs It also explains how to mine the EHR collection to extract interesting patterns group entities to various classes or decide whether an EHR satisfies a given property Most of the book focuses on textual or numeric data of EHRs where more searching and mining progress has occurred A chapter on the processing of medical images is also included Maintaining a uniform style across chapters and minimizing technical jargon this book presents the various ways to extract useful knowledge from EHRs It skillfully discusses how EHR data can be effectively searched and mined
