Introduction to Engineering: Engineering Fundamentals and Concepts

,2018-12-11 The future presents society with enormous challenges on many fronts such as energy infrastructures in urban settings mass migrations mobility climate healthcare for an aging population social security and safety In the coming decennia leaps in scientific discovery and innovations will be necessary in social political economic and technological fields Technology the domain of engineers and engineering scientists will be an essential component in making such innovations possible Engineering is the social practice of conceiving designing implementing producing and sustaining complex technological products processes or systems The complexity is often caused by the behaviour of the system development that changes with time that cannot be predicted in advance from its constitutive parts This is especially true when human decisions play a key role in solving the problem Solving complex systems requires a solid foundation in mathematics and the natural sciences and an understanding of human nature Therefore the skills of the future engineers must extend over an array of fields The book was born from the Introduction to Engineering courses given by the author in various universities At that time the author was unable to find one text book that covered all the subjects of the course The book claims to fulfil this gap

Forthcoming Books Rose Arny,1999 **ECKM2014-Proceedings of the 15th European conference on Knowledge Management** Carla Vivas,2014-10-01 The world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain This provides an illustration that in order to create new or modified knowledge practices strengthen customer relationships and thus positively influence customer satisfaction organizations must be flexible in configuring combining knowledge and knowledge structures in a way that is appropriate for delivering value to the customer It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services Thus unlearning forgetting becomes a critical means for organizational success The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community s in depth understanding of learning and unlearning to better understand knowledge management Our aim is to stimulate breakthrough research streams linking learning unlearning and knowledge management How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes Building upon existing work on knowledge management KM and organizational learning the conference will promote interdisciplinary approaches from computer science and information systems business management and organization science as well as cognitive science Emphasis will be put on systematic learning from experience KM tools and KM success factors A special interest belongs to knowledge management initiatives which are lightweight i e do not place considerable additional burden on users and KM experts allow an incremental adoption i e do not require large up front investment before any return of investment is at least visible and are flexible regarding frequent changes in experts and topics Continuing the success of the ECKM conference series since 2000 the 2015 conference will

provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations
