## **Insurance Distribution Directive And Mifid 2 Implementation:**

**Insurance Distribution Directive** Pierpaolo Marano, Kyriaki Noussia, 2020-11-12 This open access volume of the AIDA Europe Research Series on Insurance Law and Regulation offers the first comprehensive legal and regulatory analysis of the Insurance Distribution Directive IDD. The IDD came into force on 1 October 2018 and regulates the distribution of insurance products in the EU. The book examines the main changes accompanying the IDD and analyses its impact on insurance distributors i.e. insurance intermediaries and insurance undertakings as well as the market. Drawing on interrelations between the rules of the Directive and other fields that are relevant to the distribution of insurance products it explores various topics related to the interpretation of the IDD e.g. the harmonization achieved under it its role as a benchmark for national legislators and its interplay with other regulations and sciences while also providing an empirical analysis of the standardised pre contractual information document. Accordingly the book offers a wealth of valuable insights for academics regulators practitioners and students who are interested in issues concerning insurance distribution.

**Distribution of Insurance-Based Investment Products** Pierpaolo Marano, Ioannis Rokas, 2019-03-27 The book addresses a topic at the intersection of two heavily regulated sectors insurance and investment services. Until recently scholars and professionals have approached insurance and investment services as two separate categories in the financial services sector and as being governed by separate regulatory frameworks. In practice however the boundaries were and are blurred a reality that regulators have begun to recognize and address in their more recent regulatory texts. The first part of the book approaches the new standards applicable to investment products based on insurance insurance based investment products IBIPs. These rules are harmonized across the EU. The rationale behind this new definition is provided together with a description of these products limitations. The analysis addresses the new rules and explores the legal regime and relevant standards applicable to IBIPs. The organizational rules concerning the design and distribution of IBIPs are also examined and the book highlights e.g. how these rules are inspired by the principles of conduct. In closing the ADR systems are analysed in order to ascertain whether or not they can offer an effective tool for settling disputes over these products. In turn the second part focuses on the liability for distribution of IBIPs which ranks as one of the most conspicuous and relatively new legal phenomena but at the same time represents an exceptionally important field of civil liability in today's world. Liability is still regulated at the national level. Thus the four largest life insurance markets in the EU are considered along with the largest emerging market for life insurance. The chapters on national laws also consider whether and if so how the new harmonized rules on IBIPs are being combined with those already in force in the jurisdictions considered. The goal is to determine whether the new rules are likely to change the doctrine and case law approach to these products or whether the European legislators' choices have no real impact on the protection of clients.

**Insurance Regulation in the European Union** Pierpaolo Marano, Michele Siri, 2017-10-13 This book explores the profound transformation that has taken place in European insurance legislation since

January 2016 Expert contributions discuss the changes that have taken place in the supervision of insurance and reinsurance undertakings through an economic risk based approach They outline the European insurance market before going on to show how Solvency II and Insurance Distribution Directive IDD are expected to generate significant benefits and have a positive impact on all parties involved in the insurance industry the supervisory authorities and the insured They also show how Solvency II is likely to benefit the economy as a whole promoting more efficient allocation of capital and risk in a financial stability framework This volume will be of interest to academics and researchers in the field of insurance regulation

the PRIIPs Regulation and the UCITS Directive The analysis reveals numerous inconsistencies and interpretation difficulties The author argues that while some of the shortcomings are inherent to the EU piecemeal approach other problems should and could have been avoided by adopting a holistic approach of financial regulation and supervision

**Insurance Distribution Directive**, 2019 General good rules are provisions which are part of the legal system of the host Member State The basic principle underlying the general good in the insurance sector is that an insurance undertaking or an insurance intermediary operating under the respective arrangements laid down by Solvency II or the Insurance Distribution Directive IDD is obliged to adapt its activities to the host Member State rules if the measures enforced against it serve the general good irrespective of whether it carries on those activities through freedom of establishment namely as a branch or under the freedom to provide services In line with the requirement for EIOPA to examine national general good rules this report provides both a factual description of the types of rules which are published on the websites of the competent authorities and are applicable to insurance distribution activities and a general assessment facilitating the checking of main areas of divergence and impact of the general good provisions on the proper functioning of the IDD and the internal market more broadly

**European Insurance Law within the Digital Age** Cristina Poncibò,Piotr Tereszkievicz,2025-10-27 This edited volume examines how recent technological innovations are transforming European insurance law focusing on critical issues such as transparency information duties fairness and the regulation of insurance contracts for both professional and private policyholders While new business models like digital platforms and robo advisory services are rapidly emerging European law has yet to provide a sufficiently tailored regulatory response The current sectoral framework notably Directive EU 2016 97 on insurance distribution IDD offers a general principle based approach but lacks the specificity needed to effectively address innovative digital insurance distribution models In parallel broader regulatory initiatives such as the EU Artificial Intelligence Act EU AI Act and the Digital Services Act DSA are poised to reshape the digital insurance ecosystem The EU AI Act introduces horizontal rules governing AI systems including those used in automated underwriting risk profiling and robo advisory services thereby directly affecting the design and accountability of algorithmic tools in insurance distribution especially those deemed high risk The DSA imposes new responsibilities on digital platforms with potential implications for InsurTech firms acting as intermediaries or aggregators Additionally there is ongoing uncertainty as to whether existing consumer protection instrument such as the Unfair Contract Terms Directive 93 13 EEC the Unfair Commercial Practices Directive 2005 29 EC and the Omnibus Directive 2019 2161 EC are sufficient to address the novel risks and challenges posed by digital insurance services Meanwhile regulatory guidance from supervisory bodies such as EIOPA and national authorities is increasingly addressing InsurTech related legal questions in a more targeted manner By providing a normative and comparative legal analysis this volume addresses a significant gap in current scholarship It calls on legal scholars and insurance experts to reassess the role of technology in shaping EU insurance law

and to reflect on whether the regulatory principle of technological neutrality remains viable Ultimately the book argues for an integrated regulatory approach that aligns socio technical governance with the specific demands of insurance law ensuring effective consumer protection in an increasingly digital landscape
