

- **4 Levels of Ethics.**
 - Descriptive.
 - What people happen to believe is right and wrong.
 - Normative.
 - What we should believe is right and wrong, development of moral theories and principles.
 - Metaethics.
 - The study of what ethical language actually means (not doing).
 - Applied Ethics.
 - The application of normative principles to actual dilemmas, situations, activities.
- **Ethical Relativism.**
 - Relativism is the view that there are no moral absolutes ; all views are equally valid.
 - Truth is different to different people.
 - Allows for moral disagreement.
 - Two people can legitimately be right.
- **The Argument from Disagreement.**
 - Different people have different beliefs about morality
 - Therefore, there are no objective facts about morality. Relativism reduces moral claims to expressions of taste.
- **Is the "Argument from Disagreement" sound?**
 - Arguments have two parts.
 - Premises : Statements in an argument that provide support for the conclusion.
 - Conclusion : A statement that indicates what the arguer is trying to prove.
 - A Valid Argument : The conclusion logically follows from the premises.
 - A Sound Argument : The argument is valid and the premises are true.
 - Therefore, the argument is not sound because the fact that peoples disagree about morality doesn't necessarily mean that morality is subjective.
- **The Problem of Moral Diversity**
 - Should companies conform to local practices in order to be competitive?
 - Italian Tax Mores
- **Playing "Devil's Advocate".**
 - It may be permissible to cheat if cheating is a well-known feature of the game : not following the "rules" of the game unfairly disadvantages oneself.
 - This assumes all players are aware of these rules, and free to accept or reject them : this equals the playing field.
- **Ethical Reasoning**
 - Reflective Equilibrium
 - Strives for consistency in our moral beliefs
 - A state of balance among a set of beliefs arrived at by a process of deliberative mutual adjustment among general principles, and particular judgement.
- **Moral Principles < — — — — > Moral Encounters**
- **Moral Intuition**
 - A belief / feeling we have as to whether a certain action is right or wrong in some situations.

Handbook of the Logic of Argument and Inference R.H. Johnson, H.J. Ohlbach, Dov M. Gabbay, John Woods, 2002-09-11 The Handbook of the Logic of Argument and Inference is an authoritative reference work in a single volume designed for the attention of senior undergraduates graduate students and researchers in all the leading research areas concerned with the logic of practical argument and inference After an introductory chapter the role of standard logics is surveyed in two chapters These chapters can serve as a mini course for interested readers in deductive and inductive logic or as a refresher Then follow two chapters of criticism one the internal critique and the other the empirical critique The first deals with objections to standard logics as theories of argument and inference arising from the research programme in philosophical logic The second canvasses criticisms arising from work in cognitive and experimental psychology The next five chapters deal with developments in dialogue logic interrogative logic informal logic probability logic and artificial intelligence The last chapter surveys formal approaches to practical reasoning and anticipates possible future developments Taken as a whole the Handbook is a single volume indication of the present state of the logic of argument and inference at its conceptual and theoretical best Future editions will periodically incorporate significant new developments *The Development, Significance, and Some Limitations of Hegel's Ethical Teaching* Wysznie Shionyu Chang, I.
