Machine Learning Yearning:

Beyond Algorithms James Luke, David Porter, Padmanabhan Santhanam, 2022-05-29 With so much artificial intelligence AI in the headlines it is no surprise that businesses are scrambling to exploit this exciting and transformative technology. Clearly those who are the first to deliver business relevant AI will gain significant advantage. However, there is a problem. Our perception of AI success in society is primarily based on our experiences with consumer applications from the big web companies. The adoption of AI in the enterprise has been slow due to various challenges. Business applications address far more complex problems and the data needed to address them is less plentiful. There is also the critical need for alignment of AI with relevant business processes. In addition, the use of AI requires new engineering practices for application maintenance and trust. So how do you deliver working AI applications in the enterprise? **Beyond Algorithms: Delivering AI for Business** answers this question. Written by three engineers with decades of experience in AI and all the scars that come with that, this book explains what it takes to define, manage, engineer, and deliver end-to-end AI applications that work. This book presents core conceptual differences between AI and traditional business applications. A new methodology that helps to prioritise AI projects and manage risks. Practical case studies and examples with a focus on business impact and solution delivery. Technical Deep Dives and Thought Experiments designed to challenge your brain and destroy your weekends.
