### HUMAN COMPUTER INTERACTION

#### UNIT-I

#### INTRODUCTION

Human-computer interaction (HCI), alternatively man-machine interaction (MMI) or computer-human interaction (CHI) is the study of interaction between people (users) and computers.

- With today's technology and tools, and our motivation to create really effective and usable interfaces and screens, why do we continue to produce systems that are inefficient and confusing or, at worst, just plain unusable? Is it because:
  1. We don't care?
  2. We don't possess common sense?
  3. We don't have the time?
  4. We still don't know what really makes good design?

#### DEFINITION

- "Human-computer interaction is a discipline concerned with the design, evaluation and implementation of interactive computing systems for human use and with the study of major phenomena surrounding them."

#### GOALS

- A basic goal of HCI is
  - to improve the interactions between users and computers
  - by making computers more usable and receptive to the user's needs.
- A long term goal of HCI is
  - to design systems that minimize the barrier between the human's cognitive model of what they want
  - to accomplish and the computer's understanding of the user's task

#### WHY IS HCI IMPORTANT

- User-centered design is getting a crucial role!
- It is getting more important today to increase competitiveness via HCI studies (Norman, 1990)

**Formal Methods in Human-Computer Interaction** Philippe Palanque, Fabio

Paternò,1998 This volume examines the proposition that formal methods are one of the conceptual tools that can support the design of Interactive Systems understanding of their behaviour and reasoning about their properties All the approaches considered take into account some aspect of the Web environment which is one of the most successful software products of recent years millions of people use it every day in order to search for exchange and modify information As the case study in this volume it provides a familiar background against which problems can be discussed Book jacket *Human-Computer Interaction* Michael Lew,Nicu Sebe,Thomas S. Huang,Erwin M. Bakker,2007-11-04 This book constitutes the refereed proceedings of the International Workshop on Human Computer Interaction HCI 2007 Coverage in the 16 revised full papers presented includes affective detection and recognition human motion tracking multimedia data modeling and visualization HCI issues in image video retrieval learning in HCI input and interaction techniques perceptual user interfaces wearable and pervasive technologies in HCI and intelligent virtual environments **Human-Computer Interaction (HCI)**. , Features the Human Computer Interaction HCI Special Interest Group of the American Society for Information Science ASIS based in Silver Spring Maryland Includes information on related conferences and other events Provides access to related articles Notes that members of HCI have a special interest in human computer interaction interface design usability testing and effective online communication Links to the home page of the ASIS and its other special interest groups

**Human-computer Interaction** Peter Johnson,1992 This text provides an overview of the fundamental aspects of cognitive psychology which introduce the reader to the theoretical and empirical findings about human memory learning knowledge representation and skill acquisition The coverage of these topics in the early chapters is related to HCI by providing examples and illustrations of user interface designs The book then considers the range of models that have been developed in HCI giving examples of where these models have been used and discussing the strengths and weaknesses of the various approaches *Human-computer Interaction* Gavriel Salvendy,Michael James Smith,1993 Hardbound A total of 1 642 individuals from industry academia research institutes and governmental agencies from 41 countries submitted their work for presentation to HCI 93 Only those submittals which were judged to be of high scientific quality were included in the program These papers address the latest research and application in the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction including the cognitive social ergonomic and health aspects of work with computers Major advances in knowledge and effective use of computers in a variety of diversified application areas including offices financial institutions manufacturing electronic publishing construction and health care are addressed *Human-computer Interaction--INTERACT*. ,1990
