Youth Created Media on the Climate Crisis Richard Beach,Blaine Smith,2023-07-18 This timely book provides effective methods and authentic examples of teaching about climate change through digital and multimodal media production in the English Language Arts classroom The chapters in this edited volume demonstrate the benefits of addressing climate change in the classroom through innovative media production and cover a range of different types of media including video digital storytelling social media art music and writing with rich resources for instruction in every chapter Through the engaging ideas and strategies the contributors equip educators with the critical tools for supporting students media production In so doing they offer new perspectives on how students can employ media and production techniques to critique the status quo call for change and acquire new literacy skills As the effects of the climate crisis become increasingly visible to the youth population this book helps foster and support youth agency and activism

Youth Media Creation on the Climate Change Crisis Hear Our Voices is a necessary text for students preservice teachers and educators in literacy education media studies social and environmental studies and STEM education The eBook version of the text features embedded audio and video components as well as interactive links to reflect the multimodal nature of students work spotlighting how youth media production supports the development of students critical literacy skills and shapes their voices and identities

Academic and Research Writing: Critical Thinking, Methodology, and Scholarly Writing Arshad H. Bhat,2026-01-29 Writing is the medium of transition between thought and knowledge between inner knowledge and open conversation Academic and research writing is not just a technical art but a form of thinking questioning and engaging in the common search of truth The book *Academic and Research Writing From Ideas to Publication* is authored under the assumption that good writing develops out of good thinking and that both can be developed through practice coaching and self reflection Many students researchers and teachers in any field usually have the same problems how to work out ideas into clear arguments how to use sources in a manner that is ethical how to write confidently or how to fulfill the requirements of academic communities Academic writing is viewed as strict and frightening by many learners and is full of rules and formalities However deep down academic writing is merely a rigorous kind of dialogue one where writers pay keen attention to what has already been said meditate about ideas and present a line of reasoning of their own The book is structured in a way that it takes readers

through the whole process of writing academic and research papers It starts with the basics of academic writing its aims organization and procedures and slowly progresses to the more skilled types like argumentation critical writing disciplinary writing styles clarity of language and lastly publication and presentation of academic work Each chapter is constructed on the one before it and it demonstrates that there is no single writing but it is constant questioning drafting refining and revising The chapters focus on the fact that writing is not anonymous to thinking In writing we learn what we really are sure of what we really know and all that is yet unclear Writing can also make us challenge our thoughts sharpen our arguments and be able to communicate responsibly with others The same main principles regardless of whether it is a case of an essay a research paper a thesis or a journal article are clarity evidence logic and ethical integrity This book targets students early career researchers and teachers who operate in various disciplinary and cultural settings It is aware that academic writing does not take the same form everywhere it varies in different disciplines like humanities social sciences natural sciences and professional studies Simultaneously it emphasizes the common set of values which hold all scholarly writing in common respect towards evidence good judgment and veracity in representation This book is aimed not to give strict formulae but to work out the cognition It does not just present rules but also provides the rationale behind the academic conventions therefore the readers would apply them intelligently instead of applying them blindly Examples explanations and discussions are made in easily accessible language such that even sophisticated concepts regarding writing and research may be comprehended by the learners at various levels Last but not least this book is authored in high regard of learners Being a non writer is not the same as being dumb rather it is learning something complicated that requires time All good writers were already beginners Through patience practice and advice anyone can learn that he can write with clarity make a case and add value to both academic and professional life Should this book assist readers in thinking more clearly writing more confidently and engaging in the world of ideas more it will surely have served its end

Professional NoSQL Shashank Tiwari, 2011-09-13 A hands on guide to leveraging NoSQL databases NoSQL databases are efficient powerful tools for storing and manipulating vast quantities of data Most NoSQL databases scale well as data grows and often are flexible enough to accommodate semi structured and sparse data sets This comprehensive hands on guide presents fundamental concepts and practical solutions for using NoSQL databases Expert author Shashank Tiwari begins with a helpful introduction to NoSQL explaining its characteristics and typical uses He then looks at where it fits in the application stack His unique insights help you choose which NoSQL solutions are best for solving your specific data storage needs Professional NoSQL Demystifies key concepts that relate to NoSQL databases including column family oriented stores key value databases and document databases Delves into installing and configuring a number of NoSQL products and the Hadoop family of products Explains ways of storing accessing and querying data in NoSQL databases through examples that use MongoDB HBase Cassandra Redis CouchDB Google App Engine Datastore and more Examines architecture and internals Provides guidelines for optimal

usage performance tuning and scalable configurations Presents a number of tools and utilities relating to NoSQL distributed platforms and scalable processing including Hive Pig RRDtool Nagios and more Wrox Professional guides are planned and written by working programmers to meet the real world needs of programmers developers and IT professionals Focused and relevant they address the issues technology professionals face every day They provide examples practical solutions and expert education in new technologies all designed to help programmers do a better job wrox.com Programmer Forums Join our Programmer to Programmer forums to ask and answer programming questions about this book join discussions on the hottest topics in the industry and connect with fellow programmers from around the world Code Downloads Take advantage of free code samples from this book as well as code samples from hundreds of other books all ready to use Read More Find articles ebooks sample chapters and tables of contents for hundreds of books and more reference resources on programming topics that matter to you
