Inclusion and Innovation in the Digital Economy Ewelina Sokołowska, Małgorzata Gawrycka, 2026-02-19 Inclusion and Innovation in the Digital Economy shows how Europe's digital future can be both innovative and inclusive. Based on EU 27 data from 2015 to 2023, it uncovers what truly drives digital progress and how countries can align technological growth with social equity. At its heart lies a unique framework that connects innovation with inclusion, highlighting not only technology and growth but also the critical roles of skills, trust, and fairness. By combining advanced analytical tools with accessible explanations, the book maps national pathways of digitalisation and develops credible scenarios to 2030 for indices such as Digital Economy and Society Index (DESI). The results are clear: Information and Communication Technologies (ICT) and human capital are the decisive channels through which socio-economic structures shape digital outcomes. By identifying distinct trajectories across the EU, the book translates complex data into actionable insights for policy, strategy, and investment. With clear visuals, transparent sources, and replicable methods, it is both rigorous and practical. This book is written for researchers seeking evidence, policymakers shaping digital strategies, and business leaders making informed decisions. It is not just another academic study but a decision-enabling resource for Europe's digital decade.

Enhancing Graduate Employability in an Evolving Workforce Aziz, Muhammad Abdul, Mahroof, Kamran, Christiansen, Bryan, 2026-02-25 With rapid technological advancement and shifting labor markets, the demand for enhancing graduate employability has become a central priority for higher education institutions and policymakers alike. As industries evolve and new career pathways emerge, graduates must be equipped not only with deep disciplinary knowledge but also with practical experience and a resilient mindset. Strengthening employability in this dynamic environment requires a collaborative effort to bridge the gap between academic learning and real-world application. *Enhancing Graduate Employability in an Evolving Workforce* explores the way graduate employability has expanded significantly in recent years, reflecting its growing importance as a core strategy for higher education institutions worldwide. This book explains how employability is no longer just a concern for students entering the job market; it has become a major consideration for universities, businesses, and policymakers alike. Covering topics such as employability, workforce, and higher education, this book is an excellent resource for students, educators, employers, and policymakers.

AI-Powered Learning in Social Work, Counseling, and Psychology Norton, Jenifer, 2026-02-05 Artificial intelligence (AI) is rapidly reshaping education and professional workplaces, offering powerful new tools for learning and skill development in social work, counseling, and psychology. When thoughtfully designed and ethically applied, AI learning can enhance training by personalizing education and supporting evidence-based decision-making without replacing the human empathy at the heart of these fields. As mental health and social service professionals face increasing complexity, AI presents an opportunity to strengthen competence. *AI-Powered Learning in Social Work, Counseling, and Psychology* explores the integration of AI into online and hybrid teaching and learning within social work, counseling, and psychology.
