A Grammar of Koyra Chiini Jeffrey Heath, 1999
A Survey of Word Accentual Patterns in the Languages of the World Harry van der Hulst, Rob Goedemans, Ellen van Zanten, 2010 This volume contains a wealth of information on the word accentual metrical stress phenomena that we encounter in natural languages Two types of information will be supplied language profiles in tabular form and survey articles Of the total of 10 chapters in Part I 3 are general in nature while the other 7 describe and analyze word accentual systems in all continents The volume's point of departure is a database called StressTyp StressTyp developed into a database on word prosodic systems of the languages of the world The over 500 languages representing a wide geographical distribution taken from the StressTyp database will be represented in this volume For all these languages information regarding identity sources and stress locations will be included accompanied by some examples in nearly all cases These language data packages will be organized by language family This information constitutes Part II of the volume

Language George Melville Bolling, Bernard Bloch, 2010 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin
The Oxford Handbook of Vowel Harmony Nancy A. Ritter, Harry van der

Hulst,2024-09-17 This handbook provides a detailed account of the phenomenon of vowel harmony a pattern according to which all vowels within a word must agree for some phonological property or properties Vowel harmony has been central in the development of phonological theories thanks to its cluster of remarkable properties notably its typically unbounded character and its non locality and because it forms part of the phonology of most world languages The five parts of this volume cover all aspects of vowel harmony from a range of theoretical and methodological perspectives Part I outlines the types of vowel harmony and some unusual cases before Part II explores structural issues such as vowel inventories the interaction of vowel harmony and morphological structure and locality The chapters in Part III provide an overview of the various theoretical accounts of the phenomenon as well as bringing in insights from language acquisition and psycholinguistics while Part IV focuses on the historical life cycle of vowel harmony looking at topics such as phonetic factors and the effect of language contact The final part contains 31 chapters that present data and analysis of vowel harmony across all major language families as well as several isolates constituting the broadest coverage of the phenomenon to date

Spatial Interrogatives in Europe and Beyond Thomas Stolz,Nataliya Levkovich,Aina Urdze,Julia Nintemann,Maja Robbers,2017-08-07 The extant generalizations about the grammar of space rely heavily on the analyses of declarative sentences There is a need to check whether these generalizations also hold in the domain of interrogation To this end this book analyzes data from some 450 languages including non standard varieties The focus is on paradigms of spatial interrogatives such as English where whither and whence and their internal organization These paradigms are checked for recurrent patterns of morphological mismatches such as syncretism and different degrees of complexity e g the number of segments The data base consists of a large parallel literary corpus *Le petit prince* and translations thereof which is complemented by further sources of information such as descriptive grammars The data are analyzed from a synchronic perspective However diachronic issues are addressed unsystematically too It is shown that the distribution of phenomena which characterize paradigms of spatial interrogatives are subject to areal linguistic factors This is the first typological study of spatial interrogatives It provides new insights for students of the grammar of space morphological paradigms and language typology 田村幸子,2014 *Clause Linkage in Cross-linguistic Perspective* Volker Gast,Holger Diessel,2012 The volume is a collection of thirteen papers given at the Third Syntax of the World s Languages conference complemented with four additional papers as well as an introduction by the editors All contributions deal with clause combining focusing on one or both of the following two dimensions of analysis properties of the clauses involved types of dependency The studies are data driven and have a cross linguistic or typological orientation In addition to survey papers the volume contains in depth studies of particular languages mostly based on original data collected in recent field work **Grammaticalization**

Scenarios from Europe and Asia Walter Bisang,Andrej Malchukov,2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically

and structurally diverse languages To address the problem of the limitations of the secondary sources for grammaticalization studies the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire
