Trends in Industrial and Applied Mathematics Abul Hasan Siddiqi, M. Kocvara, 2013-12-01 An important objective of the study of mathematics is to analyze and visualize phenomena of nature and real world problems for its proper understanding. Gradually it is also becoming the language of modern financial instruments. To project some of these developments the conference was planned under the joint auspices of the Indian Society of Industrial and Applied Mathematics ISIAM and Guru Nanak Dev University G N D U Amritsar India. Dr Pammy Manchanda, chairperson of Mathematics Department G N D U was appointed the organizing secretary and an organizing committee was constituted. The Conference was scheduled in World Mathematics Year 2000 but due one reason or the other it could be held during 22-25 January 2001. However, keeping in view the suggestion of the International Mathematics Union, we organized two symposia: Role of Mathematics in industrial development and vice versa, and How image of Mathematics can be improved in public. These two symposia aroused great interest among the participants and almost everyone participated in the deliberations. The discussion in these two themes could be summarized in the lengthy following lines: Tradition of working in isolation is a barrier for interaction with the workers in the other fields of science and engineering; what to talk of non-academic areas, specially the private sector of finance and industry. Therefore, it is essential to build bridges within institutions and between institutions.

Applied Mathematics Entering the 21st Century James M. Hill, Ross Moore, 2004-04-01 Included in this volume are the Invited Talks given at the 5th International Congress of Industrial and Applied Mathematics. The authors of these papers are all acknowledged masters of their fields having been chosen through a rigorous selection process by a distinguished International Program Committee. This volume presents an overview of contemporary applications of mathematics with the coverage ranging from the rhythms of the nervous system to optimal transportation, elasto-plasticity, computational drug design, hydrodynamic and meteorological modeling and valuation in financial markets. Many papers are direct products of the computer revolution: grid generation, multi-scale modeling, high-dimensional numerical integration, nonlinear optimization, accurate floating point computations and advanced iterative methods. Other papers demonstrate the close dependence on developments in mathematics itself and the increasing importance of statistics. Additional topics relate to the study of properties of fluids and fluid flows or add to our understanding of Partial Differential Equations.

Computational Intelligence and Intelligent Systems Hengjian Tong, Zhuo Kang, 2010-10-06 The CCIS series is devoted to the publication of proceedings of computer science conferences. Its aim is to efficiently disseminate original research results in informatics in printed and electronic form. While the focus is on publication of peer-reviewed full papers presenting mature work, inclusion of reviewed short papers and abstracts reporting on work in progress is welcome too. Besides globally relevant meetings with internationally representative program committees guaranteeing a strict peer-reviewing and paper selection process, conferences run by societies or of high regional or national relevance are considered for publication as well. The topical scope

of CCIS spans the entire spectrum of informatics ranging from foundational topics in the theory of computing to information and communications science and technology and a broad variety of interdisciplinary application fields Publication in CCIS is free of charge No royalties are paid however CCIS volume editors receive 25 complimentary copies of the proceedings CCIS proceedings can be published in time for distribution at conferences or ad post proceedings as printed books and or electronically as CDs furthermore CCIS proceedings are included in the CCIS electronic book series hosted in the SpringerLink digital library The language of publication is exclusively English Authors publishing in CCIS have to sign the Springer CCIS copyright transfer form however they are free to use their material published in CCIS for substantially changed more elaborate subsequent publications elsewhere For the preparation of the camera ready papers files authors have to strictly adhere to the Springer CCIS Authors Instructions and are strongly encouraged to use the CCIS LaTeX style files or templates Book jacket Convex Optimization Stephen Boyd,Lieven Vandenbergh,2004 Perspectives on Optimization A.
