Empirical Studies of Programmers Curtis R. Cook, Jean C. Scholtz, James C. Spohrer, 1993 This volume looks at the obvious trend in the computing evolution from studies of student programmers and toward studies of real programmers performing real programming tasks The percentage of student and professional programmers in the studies reported in papers presented at ESP 1 and ESP 5 has nearly flip flopped There is now an emphasis on the practical application of the research results both in industry and in academia The papers and posters of this workshop include a range of programming language paradigms beyond the procedural paradigm functional logic visual object oriented and concurrent programming This appears to be an indication of the maturation of the field No longer is it a question of whether to study programmers but more a question of which aspects of the programming that make it an important area of study
