Airline Finance:

Foundations of Airline Finance Bijan Vasigh, Ken Fleming, Liam Mackay, 2010 *Foundations of Airline Finance Methodology and Practice* is a textbook that comprehensively covers at a basic level all aspects of the subject bringing together many of the numerous and informative articles and institutional developments that have characterized the field of airline finance in the previous two decades. The book is of greatest value to students who are contemplating entering financial management in the air transportation industry; however, the text also serves as an accessible and comprehensive reference for industry professionals. *Airline Finance* Peter S. Morrell, 2007. Revised and updated in its third edition, this internationally renowned and respected book provides the essentials to understanding all areas of airline finance. Designed to address each of the distinct areas of financial management in an air transport industry context, it also shows how these fit together while each chapter and topic provides a detailed resource which can be also consulted separately. Thoroughly amended and updated throughout the third edition, it reflects the many developments that have affected the industry since 2001. It features several important new topics including Low Cost Carriers (LCCs), fuel hedging, and US Chapter 11 provisions.

Foundations of Airline Finance Bijan Vasigh, 2014-11-13. In recent years, the airline industry has experienced severe volatility in earnings, with airlines recording periods of substantial profits that are closely followed by periods of financial distress. This trend has continued into the new millennium with numerous examples of airlines across the globe entering bankruptcy protection or liquidating. The text provides an introduction to both the basics of finance and the particular intricacies of airline finance, where there can be significant fluctuations in both revenues and costs. This new edition also includes capital budgeting, management of current assets, financial risk analysis, fuel hedging, and aircraft leasing. This textbook contains chapters that cover unique aspects of the aviation financial decision-making process. These include a rigorous and structured presentation of the buy versus lease decision that is prevalent in the industry, a valuation process for aviation assets, the recent trend toward privatization, and the difficulty inherent in the valuation of a publicly owned or semi-publicly owned asset. *Foundations of Airline Finance*, now in its second edition, is an introductory text that can be used either as a general financial text or in a specialized class that deals with aviation finance in particular. **Airline Management Finance** Victor Hughes, 2019-12-05. *Airline Management Finance: The Essentials* is of significant benefit to airline industry practitioners seeking a focused, neatly contained, and accessible resource that provides explicit financial information pertinent to their current or future role. The book explains and demystifies an airline's financing and the financial reporting of its operations to airline staff and others. It seeks to explain the role of finance and the Finance Department in a non-technical way so staff can appreciate the value of the department and its information resources and see finance as an active contributor to the airline's operation. It concentrates on practical matters, explaining frequently used financial and accounting terms, how financial strategy works, the uses of various types of financial reporting, as well as what financial risk is and how it

can be managed through the co operation of finance and operating staff Staff who understand the airline s finances and financial system are more likely to make decisions which align with the airline s strategy and objectives They will also know how to use the financial information which is available The book establishes a good foundation of financial knowledge for all staff This book is recommended reading for new employees in airline finance and related areas as well as those starting to move up the supervisory ladder in an airline
