

Claims, Counterclaims, & Rebuttals!

- Think about a recent argument you were in.
- What was the point you were trying to make?

What's a claim?

- A claim is **an arguable statement**—
 - the claim shares your opinion and can be argued one way or another.
- For example:
 - Students should be allowed to chew gum at school.

OH, so you
wanna argue?

Claims And Counterclaims:

A Guide to the ICC Rules of Arbitration Yves Derains, Eric A. Schwartz, 2005-01-01 The ICC Rules of Arbitration constitute one of the world's oldest and most widely used sets of rules for the resolution of international commercial disputes. In 1998, shortly after the entry into force of the current version of the Rules, the First Edition of this book appeared and quickly became an indispensable resource for all those involved or interested in ICC arbitrations, including arbitrators, counsel, and parties. In this updated and revised edition, the authors, two of the world's leading experts on ICC arbitration, have revised the Guide in order to take stock not only of the evolution in ICC practice over the last seven years but of new arbitral and judicial decisions bearing on the interpretation and application of the Rules and of developments in international arbitration practice generally. The Guide's notable features include article-by-article commentary on the ICC Rules, enriched by the authors' personal involvement in their drafting and years of experience as arbitrators, counsel, and former Secretaries General of the ICC International Court of Arbitration; ample and greatly expanded references in respect of the Rules and individual provisions to relevant national court judgments and arbitral awards; together with extensive bibliographical sources and up-to-date statistics on ICC arbitration and copies of all ICC rules on dispute resolution mechanisms in addition to arbitration. A truly comprehensive reference work on ICC arbitration practice, the Second Edition of the Guide will be of immeasurable value to corporate counsel, international lawyers, and business people, as well as to all those interested in the international arbitration process.

Modern Curriculum for Gifted and Advanced Academic Students Todd A. Kettler, 2021-09-03 Modern Curriculum for Gifted and Advanced Academic Students addresses the need for advanced curriculum design in an age of national standards and 21st-century learning innovations. The text and its authors work from the assumption that the most advanced learners need a qualitatively different design of learning experiences in order to develop their potential into outstanding achievement, answering the question: How should we design learning experiences for our most advanced academic students in the foundational curriculum areas? This book provides the most contemporary thinking about how to design in-depth courses of study in the foundational curriculum areas with a high degree of complexity and advanced content. The book includes chapters articulating specific design components like creative thinking, critical thinking, and authentic research, but also subject-specific chapters in mathematics, language arts, science, and social studies to demonstrate application of those design components.
