Citizen Journalism:

Citizen Journalism Stuart Allan, Einar Thorsen, 2009 *Citizen Journalism Global Perspectives* examines the spontaneous actions of ordinary people caught up in extraordinary events and compelled to adopt the role of a news reporter. This collection of twenty-one chapters investigates citizen journalism in the West including the United States, United Kingdom, Europe, and Australia, as well as its development in other national contexts around the globe including Brazil, China, India, Iran, Iraq, Kenya, Palestine, South Korea, Vietnam, and even Antarctica. Its aim is to assess the contribution of citizen journalism to crisis reporting and to encourage new forms of dialogue and debate about how it may be improved in the future. The book contains contributions by Mark Deuze about *The Future of Citizen Journalism* and Paul Bradshaw about *Wiki Journalism*.

Citizen Journalism Melissa Wall, 2012 Using digital tools such as YouTube and Twitter, ordinary people are collecting and sharing news that might otherwise never get reported. What does this trend mean for professional journalism and ultimately for democracy? The chapters include examples of citizen journalism from Britain, Burma, Canada, Iran, Kenya, Palestine, Taiwan, and the United States.

Citizen Journalism Melissa Wall, 2018-12-20 *Citizen Journalism* explores citizen participation in the news as an evolving disruptive practice in digital journalism. This volume moves beyond the debates over the mainstream news media's attempts to control and contain citizen journalism to focus attention in a different direction: the peripheries of traditional journalism. Here, more independent forms of citizen journalism, enabled by social media, are creating their own forms of news. Among the actors at the boundaries of the professional journalism field, the book identifies the engaged citizen journalist and the enraged citizen journalist. The former consists of underrepresented voices leading social justice movements, while the latter reflects the views of conservatives and the alt-right, who often view citizen journalism as a performance. *Citizen Journalism* further explores how non-journalism arenas such as citizen science enable ordinary citizens to collect data and become protectors of the environment. *Citizen Journalism* serves as an important reminder of the professional field's failure to effectively respond to the changing nature of public communication. These changes have helped to create new spaces for new actors in such places: traditional as well as upstart forms of journalism negotiate and compete, ultimately aiding the journalism field in creating its future.

International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines. From the computer or information sciences through engineering and to social sciences, humanities, and the arts, almost all of our disciplines have made contributions to internet research, whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network. The possibility and extent of contributions of internet research vary across disciplines, as do the purposes, methods, and outcomes. Even the epistemological underpinnings differ widely. The internet then does not have a discipline of study for itself. It is a field for research. Baym 2005: an open environment that simultaneously supports many approaches and techniques.

not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation
