Peter Sloman,2019-10-30 The idea of a guaranteed minimum income has been central to

British social policy debates for more than a century Since the First World War a variety of market economists radical

activists and social reformers have emphasized the possibility of tackling poverty through direct cash transfers between the

state and its citizens As manufacturing employment has declined and wage inequality has grown since the 1970s cash

benefits and tax credits have become an important source of income for millions of working age households including many

low paid workers with children The nature and purpose of these transfer payments however remain highly contested

Conservative and New Labour governments have used in work benefits and conditionality requirements to activate the

unemployed and reinforce the incentives to take low paid work an approach which has reached its apogee in Universal Credit

By contrast a growing number of campaigners have argued that the challenge of providing economic security in an age of

automation would be better met by paying a Universal Basic Income to all citizens Transfer State provides the first detailed

history of guaranteed income proposals in modern Britain which brings together intellectual history and archival research to

show how the pursuit of an integrated tax and benefit system has shaped UK public policy since 1918 The result is a major

new analysis of the role of cash transfers in the British welfare state which sets Universal Credit in a historical perspective

and examines the cultural and political barriers to a Universal Basic Income
