How To Use Ai Tools 2025 For Experts:

Exploring Fund Management Expertise Fredrik Nilsson, 2026-01-01 This book offers novel insights into how expert fund managers those who demonstrate superior performance over the long term make their judgments and decisions It is often claimed that actively managed funds create value for investors by making more informed decisions The general idea is that experts make judgments and decisions that will outperform passively managed funds i e the market Although such claims seem reasonable many actively managed funds do not consistently beat the market Additionally it is argued that the fees charged by actively managed funds are too high relative to the value they provide However some assert that certain fund managers do outperform the market in the long term Regardless of the position one takes there is a clear need to critically examine and discuss the concept of fund management expertise The book also explores how recent and significant societal developments such as sustainability artificial intelligence and multiple accountabilities are shaping the nature of expertise today and how it might evolve in the future The book draws on both earlier research on expertise and recent publications related to business and accounting as well as insights from new empirical studies It appeals to both scholars and professionals in finance wanting to learn about capital markets and fund management [AI and Effectiveness of Digital Advertising Ecosystems](#) Manali Bhattacharya, Sayak Pal, Ayan Banerjee, Saptaparni Roy Chaudhury, Utsa Pramanik, Jayeeta Majumder, Sourav Gangopadhyay, Ashmita Saha, Abhijit Das, Kankana Ghosh, Piali Haldar, Dev Kumar Mandal, Harsha T R, Likewin Thomas, Vaishnavi P Bhat, Vinay S K, Adnan Ali, Aya Kamal Mahmoud, Khaled Salah Mohamed Fahmy, Tanupriya Mukherjee, Soumya Roy, Sushmita, Amandeep Kaur, Amanpreet Kaur, Jyoti Dutta, Poulami Roy, Mahendra Kumar Jena, N.G. Kalyani Reddy, Ankit Pandey, Somak Sen, 2026-02-01 In the rapidly evolving digital landscape Artificial Intelligence AI is revolutionizing how brands connect with consumers From personalized advertising targeting and automated content creation to predictive analytics and sentiment analysis AI has become an integral part of the digital advertising ecosystem However while its adoption accelerates there remains a need to critically assess AI s role not just as a technological tool but as a transformative force shaping creativity ethics data privacy and consumer behavior The chapters in the book collectively offer a deep and multifaceted examination of AI intervention in the digital advertising ecosystem covering a wide range of themes like advertising telemedicine adoption misinformation artificial intelligence algorithmic coercion digital erasure psychosocial vulnerability generative artificial intelligence digital media cultural algorithm social media content curation digital ecosystem personalized marketing customer engagement predictive analytics data privacy customer lifetime value clv ethical ai conversion optimization ai driven recommendation systems digital film advertising neuromarketing consumer behavior cultural personalization algorithmic transparency consumer engagement impulsive consumption digital advertising behavioural nudges micro segmentation incrementality store visit attribution reinforcement learning artificial intelligence consumer engagement personalization data driven decision making omnichannel marketing advertising activities predictive

insights big data programmatic advertising customer data automation personalization machine learning ethical literacy automation sustainability energy data consumption and environment This book aims to fill the academic and practical gap by offering a comprehensive exploration of how AI is redefining advertising strategies reshaping consumer brand relationships and challenging traditional marketing paradigms The book will serve as a comprehensive guide blending academic insights with real world practices and case studies addressing both the opportunities and challenges posed by AI driven advertising The volume will combine theoretical perspectives case studies and expert insights making it relevant for scholars practitioners marketers and policy makers Integrating Marketing Analytics Approaches into B2B Lead Management Laura Hannemann,2026-02-13 Despite the growing importance of acquiring new customers due to increased global competition lead management processes in business to business B2B companies often remain ineffective Marketing analytics offers opportunities to address common issues in lead generation lead scoring and lead nurturing through data insights Simultaneously it enables companies to measure the effectiveness of their lead management efforts Nevertheless the extent of data driven decision making varies in practice and the academic literature on marketing analytics in B2B lead management remains fragmented This thesis bridges the gap by demonstrating how marketing analytics approaches can be integrated into B2B lead management to improve process effectiveness The findings are summarized in a practical guide that contains concrete steps and recommendations for B2B marketing professionals considering different maturity levels *The Digital Transformation of Professions* Richard Busulwa,Wahed Waheduzzaman,Nandana Wasantha Pathirana,2026-03-04 Globally and across industries professions are being reshaped by rapid advancements in digital technologies From AI powered diagnostic tools in healthcare to automated legal research systems and predictive financial platforms the very foundations of professional expertise value and trust are evolving Amid this change one truth remains professions that fail to adapt risk irrelevance *The Digital Transformation of Professions A Roadmap for Remaining Trustes Relevant and Future Ready* offers a timely and essential roadmap for understanding and navigating the profound shifts underway in how professional work is organized delivered and governed While digital disruption has challenged long standing roles and business models digital transformation represents a deeper opportunity to reimagine how professionals create value maintain public trust and build new futures This book explores how digital transformation manifests across every layer of professional life from day to day professional roles workflows and career pathways to governance structures public confidence and inter professional boundaries The book Explains how advancements in digital technologies drive digital disruption of the professions and how digital transformation offers a deeper opportunity to reimagine professional roles services and value Unpacks how digital profession transformation manifests across all levels of a profession from individual roles and workflows to governance structures public trust and institutional identity Discusses the new digital and or digitally enhanced professional services roles workflows and competencies that professionals must adopt to remain relevant and impactful

Advancements in Entomology

Debasis Mitra,Marika Pellegrini,Beatriz Elena Guerra Sierra,2026-01-01 This book presents a balanced view of how entomology supports both forensic investigations and sustainable agriculture It highlights the growing role of artificial intelligence AI in advancing research and practical applications in these fields The first part focuses on forensic entomology covering topics such as AI assisted insect species identification behaviour analysis predictive modelling of necrophagous insect life cycles virtual simulations and the ethical and legal issues involved in using AI in forensic science These chapters show how insects can help solve crimes when combined with modern technologies The second part covers agricultural entomology where the focus is on managing pests and improving crop health using insect based approaches and AI Topics include integrated pest management the use of beneficial insects understanding emerging pests plant pollinator interactions crop resistance strategies insect borne diseases and how climate change affects pest dynamics Additional chapters explore how AI and smart technologies are being used to monitor predict and manage insect related challenges in agriculture This book is a useful resource for students researchers professionals and policymakers working in entomology forensic science agriculture environmental studies and artificial intelligence It provides updated insights and practical knowledge for those interested in applying science and technology to solve real world problems involving insects

PC AI. ,1991 AI Valley

Gary Rivlin,2025-03-25 A veteran Pulitzer Prize winning journalist shadows the top thinkers in the field of Artificial Intelligence introducing the breakthroughs and developments that will change the way we live and work Artificial Intelligence has been just around the corner for decades continually disappointing those who long believed in its potential But now with the emergence and growing use of ChatGPT Gemini and a rapidly multiplying number of other AI tools many are wondering Has AI s moment finally arrived In AI Valley Pulitzer Prize winning journalist Gary Rivlin brings us deep into the world of AI development in Silicon Valley Over the course of more than a year Rivlin closely follows founders and venture capitalists trying to capitalize on this AI moment That includes LinkedIn founder Reid Hoffman the legendary investor whom the Wall Street Journal once called the most connected person in Silicon Valley Through Hoffman Rivlin is granted access to a number of companies on the cutting edge of AI research such as Inflection AI the company Hoffman cofounded in 2022 and OpenAI the San Francisco based startup that sparked it all with its release at the end of that year of ChatGPT In addition to

Hoffman Rivlin introduces us to other AI experts including OpenAI cofounder Sam Altman and Mustafa Suleyman the co founder of DeepMind an early AI startup that Google bought for 650 million in 2014 Rivlin also brings readers inside Microsoft Meta Google and other tech giants scrambling to keep pace On this vast frontier no one knows which of these companies will hit it big or which will flame out spectacularly In this riveting narrative marbled with familiar names such as Musk Zuckerberg and Gates Rivlin chronicles breakthroughs as they happen giving us a deep understanding of what s around the corner in AI development An adventure story full of drama and unforgettable personalities AI Valley promises to be the definitive story for anyone seeking to understand the latest phase of world changing discoveries and the minds behind them

The Digital Doctor: Hope, Hype, and Harm at the Dawn of Medicine's Computer Age Robert Wachter,2015-04-10 The New York Times Science Bestseller from Robert Wachter Modern Healthcare s 1 Most Influential Physician Executive in the US While modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive For the past few decades technology has been touted as the cure for all of healthcare s ills But medicine stubbornly resisted computerization until now Over the past five years thanks largely to billions of dollars in federal incentives healthcare has finally gone digital Yet once clinicians started using computers to actually deliver care it dawned on them that something was deeply wrong Why were doctors no longer making eye contact with their patients How could one of America s leading hospitals give a teenager a 39 fold overdose of a common antibiotic despite a state of the art computerized prescribing system How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point Logically enough we ve pinned the problems on clunky software flawed implementations absurd regulations and bad karma It was all of those things but it was also something far more complicated And far more interesting Written with a rare combination of compelling stories and hard hitting analysis by one of the nation s most thoughtful physicians The Digital Doctor examines healthcare at the dawn of its computer age It tackles the hard questions from how technology is changing care at the bedside to whether government intervention has been useful or destructive And it does so with clarity insight humor and compassion Ultimately it is a hopeful story We need to recognize that computers in healthcare don t simply replace my doctor s scrawl with Helvetica 12 writes the author Dr Robert Wachter Instead they transform the work the people who do it and their relationships with each other and with patients Sure we should have thought of this sooner But it s not too late to get it right This riveting book offers the prescription for getting it right making it essential reading for everyone patient and provider alike who cares about our healthcare system
