Nikola Tesla The Problem Of Increasing Human Energy:

The Problem of Increasing Human Energy Nikola Tesla, 2020-10-27 The Problem of Increasing Human Energy is an essay written by Nikola Tesla to honor his agreement with the editor of The Century Magazine to produce an article on his findings In this essay Tesla explained the superiority of the wireless system he envisioned but the article was more of a lengthy philosophical treatise than an understandable scientific description of his work He contemplates on how a man should utilize his time and body what makes a man productive in his highest capacity and what increases man s energy in the human capacity Tesla approaches human potential energy from the physics perspective tying it to the mass speed and removal of retarding forces When human civilization was just starting to impact the natural world Tesla was already worrying about problems of overpopulating and running out unrenewable resources He was not only pointing this out but he was already working out the solutions
