Books in Print Supplement, 1984 **The Cumulative Book Index**, 1989 A world list of books in the English language Challenges of an Interdisciplinary Science István Lakatos, 1999 During the past centuries the non renewable natural resources have changed the life of mankind

Utilization of these materials is still increasing and their availability will remain a fundamental issue throughout the next century. Similarly, the scientific and engineering knowledge also diversified in the last few decades. The driving force of these changes is the joint responsibility of scientists and engineers to economize continuously the exploration, production, processing, transportation, and storage of non-renewable natural resources. The Aim of this new series is to stimulate interdisciplinary discussion among mining, petroleum, and chemical engineers. The first volume of this series contains 46 selected papers of the 6th Symposium on Mining Chemistry held in 1998 at Siófok, Hungary. These papers include topics on the chemical problems of conventional and enhanced oil and gas recovery, organic and inorganic geochemistry, mining chemistry, mineral processing, and questions in environment.
