The Design Life of Structures G. Somerville,1991-09-01 The whole area of durability integrity and quality control of structures is starting to be taken very seriously by the construction industry Central to this is the design life concept which looks at the materials used methods of construction safety factors maintenance and repair and change of use all from a holistic viewpoint This new book Advanced Manufacturing and Industrial Engineering Xianghua Liu,2014-08-13 Selected peer reviewed papers from the 4th International Conference on Advanced Engineering Materials and Technology AEMT 2014 June 14 15 2014 Xiamen China *Applied Mechanics Reviews* ,1997 **Marine Concrete** A.L. Marshall,2013-04-17 Concrete is commonly regarded as a mundane prosaic material whilst the sea is perceived as a fearsome environment endowed with mystery Mystery stems from lack of knowledge and to that extent both concrete and sea have something in common we fall a long way short of knowing enough about them Fortunately we have learned enough from our investigations and experiences to be able to set the limits within which we should operate It is important for the engineer to seek to quantify the effects of the environment on materials and structures so that these can be made safe and adequately durable for their intended economic life This is especially true for marine structures Thus the primary purpose of this book is to provide a useful synthesis of the behaviour of concrete and concrete structures in the marine environment An outline of the content of the book is provided in the latter part of the first chapter and so will not be anticipated here The chief aim throughout however is to work as far as possible within a context of the appropriate governing physical phenomena giving due consideration to the mathematical relationships between them Moreover without intending to be a design manual an introduction is given to the sources of information which designers are likely to use as well as to structural achievements It is hoped that there should emerge an implicit integration between structure and constituent materials and the surrounding environment *The Structural Engineer* ,1987 **Marinas, recommended for design, construction and maintenance Supplement, 1947** National Association of engine and boat manufacturers,1947 *British Universities' Guide to Graduate Study* ,1991 **Engineering News-record** ,1925 **ACI Manual of Concrete Practice** ,1998 *Petroleum Abstracts.
