institutional pressures relate to complex concerns including environmental and climate impact working conditions and human rights both locally and overseas In this context as companies now appear to commit to comprehensively tackle ethical social environmental and economic challenges concerns increasingly are raised as to whether most companies in the end can indeed contribute to societal and environmental good and transform how they operate to create value responsibly considering the success and impact of so called corporate social responsibility or sustainability policies In recent decades while some companies have advanced on their social and environmental responsibility journey other companies have engaged in ethical social and environmental initiatives in manipulative and insincere way or merely as a rhetorical tool to maintain legitimacy Together with governments and business partners these companies are largely failing to deliver for society and the environment Subsequently more than ever before understanding what it means to do business responsibly and how business actors can engage constructively in ways that support the development of resilient business practices forms and organizations that contribute to generate positive impact for society and the environment and generate the type of economic value needed to address the key challenges of this century is central On this background this edited volume sheds light on different crucial themes and approaches spanning historical conceptual operational critical practical and prospective considerations that have animated the field of business and society in the last decades and that are instrumental or have the potential to drive constructive research discussions and business efforts The central aim of the book is to set the research agenda for the next five to seven years to redefine existing areas within the context of international research and to highlight emerging research areas in need of further investigation representing a prestige reference work providing an overview of the subject area of responsible business primarily for academics researchers postgraduate students as well as reflective practitioners
