TAKING NOTES

Use the graphic organizer online to take notes on the new advances in technology listed in this section.

More Technological Advances

If YOU were there...

You own a small shop in Chicago, Illinois, in the 1850s. You sell ladies' hats and gowns. When you need more hats, you send a letter to the manufacturer in New York. Sometimes it takes weeks for the letter to get there. One day, the owner of the shop next door tells you about a wonderful new machine. It can send orders from Chicago to New York in just minutes!

How would a machine like this change your business?

BUILDING BACKGROUND The Industrial and Transportation Revolutions had far-reaching effects on Americans' lives. They led to still more innovations in technology. Some of the new machines and devices speeded up processes for business owners. Others made life easier for people at home.

Telegraph Speeds Communication

In 1832 **Samuel F. B. Morse** perfected the **telegraph**—a device that could send information over wires across great distances. To develop the telegraph, Morse studied electricity and magnetism. In time, Morse put the work of other scientists together in a practical machine.

Time Line

American Inventions

1798 Eli Whitney proposed the idea of mass producing guns. Machines like this one made it possible for workers to make interchangeable parts efficiently.

1831 Cyrus McCormick invents the mechanical reaper. Harvesting grain becomes eight times more efficient.
