

Research Design

2.1 Introduction

This chapter presents the key research questions, methodological approach, and specifics of the analytical plan followed for this research. Sections review the research questions this study sought to answer, discuss the overall analysis as informed by an overview of the background research, and detail the quantitative methods for the benefit-cost analysis and the case study design and selection.

2.2 Research Questions

The analysis approached the research questions in two main phases. As outlined in the next section, the first phase relied on extant data to answer the research questions. The questions covered in the first phase were as follows:

1. What are the key health issues faced by transit workers?
 - a. What factors contribute to these issues?
 - b. What are the related safety concerns?
 - c. What key metrics are used to measure these issues and their outcomes, as found in the existing literature and current data sources?
 - d. What costs are associated with these issues?
2. What are the current approaches and possible solutions to specific health and safety problems affecting transit employees?
 - a. Where and how are they used?
 - b. What resources are involved?
 - c. What impacts do these approaches and solutions have on health and related safety issues?

The second phase incorporated information pulled from public records or provided by agencies, human resources records, insurance company records, and interviews with administrative, human resources, and health promotion program personnel. Additional research questions addressed during the second phase were:

3. What tools and techniques can be used for measuring program costs, benefits, and effectiveness?
 - a. Who benefits and who pays?
 - b. What are the costs, and how are they measured?
 - c. What are the benefits, and how are they measured?
 - d. What is effectiveness, and how is it measured?
4. What potential solutions and tools meet transit agency requirements?
 - a. What barriers will agencies face when implementing the tools and solutions suggested by this study?
