lack of cooperation over shared water resources is one of the barriers to achieve inclusive and sustainable development. Additionally, it has contributed to the prevailing anarchic situation where each country does what it wants. The absence of a formal water sharing mechanism coupled with poor water management practices within both the riparian countries are resulting in various flow and administration related challenges. Moreover, these challenges are further exacerbated by regional changes in social, political, environmental, and economic systems. The scholarly literature suggests that an analytical transboundary water governance framework is essential to address the challenges of water politicisation and securitisation, quality degradation, and quantity reduction. Additionally, the literature rarely integrates a multi-level approach, an institutional approach, an inclusive development approach, or an approach that accounts for the uses of different types of water and their varied ecosystem services for improved transboundary water governance. To enhance human wellbeing and achieve inclusive and sustainable development in the KRB, this research indicates that it is essential to: 1) defrost frozen collaboration, 2) bypass border dispute, 3) use biodiversity and ecosystem services approach, 4) address existing and potential natural and anthropogenic challenges, 5) remove contradictions in the policy environment, 6) combat resource limits and dependence by promoting collaboration on long-term cost-effective solutions, and 7) enhance knowledge and dialogue on inclusive development.

Living in Environment Im Testb Jane Heinze-Fry, Miller, 1999-05 **Environmental Sci 10e Im/Tb**
Miller, 2003-10 Essentials of Ecology George Tyler Miller, 2005

ESSENTIALS OF ECOLOGY Third Edition is the ideal alternative to other ecology texts which tend to be too difficult for non-majors. It is a succinct 13-chapter introduction using clear, straightforward language and providing the scientific foundation necessary to understand ecological issues. Tyler Miller is the most successful author in academic writing on environmental science because of his attention to currency, trend setting, presentation of content, ability to predict student and instructor needs for new and different supplements, and his ability to retain the hallmarks on which instructors have come to depend. The content in the 3rd edition of ESSENTIALS OF ECOLOGY is everything you have come to expect and more. In this edition, the author has added the How Would You Vote feature, which is an application of environmental science related topics in the news. Students apply their environmental science knowledge from the book to a Web activity which helps them investigate environmental science issues in a structured manner. They then cast their votes on the Web. Results are then tallied. Also found at the Miller website is the much-used Updates on Line, updated twice a year with articles from InfoTrac College Edition, service, CNN Today video clips, and Web links. Instructors can seamlessly incorporate the most current news articles and research findings to support text presentations. This is a time-saver for instructors and part-time teachers who can quickly determine what ancillary materials they want to utilize in just minutes. As with the last edition, this text is packaged with a free Student CD-ROM entitled Interactive Concepts in Environmental Science. Organized by chapter, the CD gives students links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves.
