Alternative Capitalisms: Geographies of Emerging Regions Robert Gwynne,Denis Shaw,Thomas Klak,2014-05-12 This book aims to examine the effects of globalization and economic and political transformations in those parts of the world

which are now regularly referred to as emerging regions These are Latin America and the Caribbean East Central Europe and the former Soviet Union and East Asia This book breaks new ground in three areas First of all it develops a critique of the use of the term emerging regions for geographers and social scientists and relates this to world systems theory Secondly it explores the development trajectories and challenges of countries in this so called emerging world countries that will be crucial to the evolution of the world economy in the twenty first century Thirdly it compares and contrasts the pathways of both economic and political change in the three world regions under focus This is a unique approach in terms of books published in both geography and the social sciences Within the context of the three world regions the book combines historical and contemporary analysis of the evolving world system In these regions we are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of production exchange and regulation are evolving The authors believe that at the present time these processes have produced alternative capitalisms economic and associated developments which while assuredly capitalist differ in various ways from those typical of the capitalist West or core economies of North America and Western Europe

The Middle East and North Africa Alasdair

Drysdale,2024-10-15 A thematic critical introduction to the regional geography of the Middle East and Northern Africa

West African Worlds Reginald Cline-Cole,Elsbeth Robson,2016-02-17 West African Worlds provides a critical assessment of social economic and political change in Africa s most populous and arguably most externally focused region With an emphasis on globalisation and modernisation case studies and commentary are integrated throughout to highlight the concerns and issues of the region Enriched by an impressive mix of West African voices this text combines theory and application with policy and practice to address socio economic change the pursuit of livelihoods and development within West Africa

Assault on Rural Poverty Haileleul Getahun,Hailemariam Getahun,2001 In Assault on Rural Poverty Haileleul Getahun analyzes the various causes of rural poverty and constraints impeding increased agricultural productivity during the last four decades in Ethiopia under three different regimes Getahun examines the feudalistic system under Emperor Haile Selassie the command economic system of the military junta led by Mengistu Haile Mariam and the current capitalist system of the Federal Republic of Ethiopia led by Meles Zenawi Getahun discusses the lessons drawn from Ethiopian experience during these three regimes as well as from other African and Asian countries These provide the basis for recommending a small farmer led agricultural and rural development strategy that if implemented would alleviate rural poverty in Ethiopia The author maintains that the keys for successful development are the provision of institutional savings and credit for small scale farmers and small business owners the deep involvement of the community in project planning implementation

evaluation and sharing of the benefits and the use of development support communication for motivation information dissemination and training Getahun argues strongly that ethnic politics in Ethiopia are destructive to Ethiopian society and militates against sustainable development Rather the path to peace and sustainable development requires that ethnic politics be scrapped and replaced by a genuinely democratic and widely acceptable system of governance **The Regional**

Geography of Canada Robert M. Bone,2005 The Regional Geography of Canada divides Canada into six geographic regions Ontario Quebec British Columbia Western Canada Atlantic Canada and the Territorial North Each region has a particular regional geography history population and a unique location These factors have determined each region s character set the direction for its development and created a sense of place In examining these themes this text underscores the dynamic nature of Canada s regional geography **Geography in the Two-year Colleges** Panel on Geography in the Two-Year

Colleges,1970 *Germany* Olaf Kühne, Florian Weber,2022-03-02 This book addresses the highly differentiated spatial social cultural and demographic structure s of Germany with a particular focus on the reciprocal relations between different levels of spatial development The historical development of Germany serves as a background in order to provide context for the development of spatially relevant ideas and ideals whether in relation to politics landscape or culture In this regard questions of divergence and convergence become highly salient The book makes the complexity of spatial and social developments in Germany comprehensible The neopragmatic approach adopted here allows bringing together different theoretical strands while providing a basis for independent regional geographic research at the same time Beginning with an overview of the physical structures of Germany which provides the material point of departure for the societal development of Germany key aspects of the German history are discussed Particular attention is paid to the reciprocal influence between material substrate and notions of landscape Here specific German trajectories of aesthetic and normative conceptions of landscape become clear A common theme throughout the book are questions of divergence and of efforts towards convergence which become evident when considering past and present economic political and demographic developments Efforts to tackle current challenges such as adapting to climate change and mitigating it or securing raw materials also become apparent The complexity of spatial processes in Germany is illustrated in case study regions dealing with the challenges of structural change in traditional industrial regions such as the Ruhr area or e g efforts of Berlin to position and find itself as the capital of a unified Germany Overall the book shows how theory driven regional geographic research can make spatiotemporal complexities tangible and comprehensible **Bulletin of the Illinois Geographical Society** ,1990 **World Regional**
